

# Learning To Cope With Financial Stress

Continued From Page 8-A

Magazines, newspaper and other media all suggest ways to save money while shopping. A simpler lifestyle might require that you not make certain purchases at all. And, if your desired outgo is reduced you may be able to balance it with your income. Here are some suggestions for making purchasing decisions if you want to reduce outgo; - Think about the basic values you believe in, and define them for yourself. You might even write them down, and discuss them with other family members to see if they hold the same values. If health is a value you believe in, should you

buy products to consume that would not provide better health for each family member? If integrity is another of your values, should you make debts you may not be able to pay? Put each of your buying decisions to this type of test - will buying and using the product or service help you live by the values you profess? -When you consider

buying a new item for the home, think about what you already have. Especially in buying appliances, do you have to have every new appliance on the market? Do you already have an appliance that does essentially the same thing? Apply this thinking for each purchase - what do I already have that could serve the same purpose? -Be aware that certain

purchases require upkeep, maintenance or accessory items that continue to drain the family budget. - How much are you willing to learn new skills to provide for family needs? - Do you have the courage to say "We can't afford it" to some purchases?
