L&N Employees With Their Families Would Form A City Of 200,000

The Louisville & Nashville Railroad has on its pay-roll 52,000 employees to whom it paid in 1923 over \$75,000,000. Most of them have families, and every one, no doubt, contributes to the support of some family.

Computing by the Government average of 4.3 persons to an American family, there are wholly supported or to some extent benefited, by the wages of L. & N. employees, over 200,000 people—a number greater than the population of a city the size of Atlanta, Georgia.

In addition, thousands of other people are given employment in various industries from which the L. & N. purchases materials and supplies of all descriptions, aggregating in 1923 over \$37,000,000.

Moreover, these 200,000 people of the L. & N. family constitute a complete city, because there is no class of labor, and hardly a single profession, not represented among the L. & N.'s 52,000 employees.

These, and other facts which the L. & N. is making public, will enable you to realize the economic value of this great transportation system to the territory it serves. They should help you to remember that as this railroad prospers so you and your neighbors prosper, and that whatever hurts the L. & N. and restricts its capacity for profitable public service must necessarily hurt you and your community.
