

WOLF CREEK

Local rains visited the most of our section Sunday and found a welcome, as they were the first we had to wet the ground in many weeks.

The most of our farmers who planted their corn early report a very poor stand.

The apple crop through our section is very limited, but the peach crop for the most part is good.

Mr. and Mrs. Frank Ledford of Belltown visited relatives here Sunday.

Mrs. Fornetta Ledford, widow of the late Rev. W. P. Ledford, whose death was reported in the Scout a few weeks ago, died on the night of May 24th. She was sick just a few days and was laid to rest beside her husband in Zion Hill cemetery, the Rev. A. P. ... and O. B. Bell conducting the funeral service.

There are some fifteen or twenty cases of whooping cough here on the creek.

Mr. Frank Bell who lived just over the line in Tennessee, has moved his family to lower Belltown.

Mr. and Mrs. Perry Carter are here on a visit to Mr. Carter's father, Mr. N. A. Carter. It is rumored that he has bought a sawmill and will make his future home here.

Mr. and Mrs. W. L. Garren and son Howard, who left here on the 14th inst. for Chattanooga and Graysonville, Tenn. returned home on the 21st with their daughter and sister. Omogoa, who has been attending the Geoperville Academy for the last two years. Miss Omogoa graduated from the academy on the 18th with the highest honors in her class, and will leave in a few months for Orlando, Fla. where she will enter a sanitarium and take a nurse course.

Valuable Drawings Water-Power Study Are Now Available

"Natural Resources," published at Raleigh, in the interest of the natural resources of the state, in its issue of May 16th, carries the following information with reference to the water-power development of Cherokee and Clay counties and this section.

Two reports on water-power possibilities of important North Carolina streams, study and investigation of which have been made for some time by the Water Resources Division of the Department of Conservation and Development, are awaiting the collection of more complete data before being published.

The more important of these studies, both of which are similar to the investigation and report made upon the development of Deep River as a single power unit, is the investigation of the Hiwassee River and its tributaries in Cherokee and Clay counties. This investigation was begun in cooperation with the county commissioners of Cherokee in the summer of 1922, the county contributing \$250 and the Department intending to appropriate \$1,000 for the work. Field work was started but it soon became apparent that additional field work would be required. Funds for some of this were contributed by private interests and a party was in the field for two months in the summer of 1923.

As the investigation proceeded it became clear that it was important that it should be broadened in scope since the yet undeveloped Hiwassee was of vital importance to a large section of Western North Carolina. Competing power companies controlling sites on the river had engaged in serious controversies affecting North Carolina communities, and it appeared that the Federal Power Commission might assert jurisdiction over the entire stream. It was therefore felt that the department should proceed with the utmost thoroughness to investigate what it considered to be the best sites for the development of the entire river, giving due regard to the interests of communities on the river, to power development, highway relocation, and to flood control.

Meanwhile, the Tennessee Basin Investigation, in charge of the corps of engineers, U. S. A., studied the situation, and the corps adopted the policy of refusing permission for large power developments without consultation of its service.

The larger and more detailed study determined upon necessary expenses far in excess of those originally contemplated for the more limited investigation and necessarily delayed the preparation of the report on the river. It has also been delayed by reason of the desire to include the results obtained by the Army engineers in their survey, but this data has been collected only in part and will not be available until the summer of 1925.

The Department is now making the completion of the report for publication early in the summer.

Preliminary Drawings

Following the completion of the preliminary report, drawings of the water-power possibilities of the Hiwassee River, showing the sites of which may be obtained from the Water Resources Division, N. C. Department of Conservation and Development, Chapel Hill, N. C., by request accompanied by money order for \$1.00 for each sheet desired, as follows:

1. Plan and Profile, Hiwassee River, Hiwassee, Ga. to Appalachia, N. C. (two sheets.)
2. Plan and Profile, North River, Hiwassee, Ga. to near Murphy, N. C. Section for dam site is shown (one sheet.)
3. Pond lines from dams on Hiwassee River above Murphy, showing areas flooded by different dams. Pond lines for 60-foot dam on Hiwassee, one mile above Murphy. Pond lines for 100-foot dam on Hiwassee, near Island Ford. Pond line for 120-foot dam on Hiwassee, near Island Ford. Pond line for 150-foot dam on the Hiwassee, near Hayesville. (5 sheets.)
4. Map showing lands and roads needed for proposed dams above Murphy on Hiwassee River (one sheet.)
5. Profile and cross-sections of dam sites on Beaver Dam, Hanging Dog, Persummon, Brasstown, Tomcat and Shooting Creeks. (Sheets in preparation.)
6. Tables of weekly stream flow at Murphy, N. C. and Balance, Tenn. and Appalachia, N. C., for a period of record. Tables are arranged both in order of magnitude and efficiency tables. The cost of each set of tables is \$1.00.

Hot House

Mr. and Mrs. G. M. Amburn of Isabella, Tenn. spent the weekend with the former's parents, Mr. and Mrs. S. D. Amburn.

Mr. A. J. Gaddis and Mr. T. S. Simonds of Isabella visited in our community Sunday.

Mr. A. L. Brown returned home last week after visiting friends and relatives in Copperhill.

Mr. Carson Wilkerson visited relatives on Wolf Creek Sunday.

Healthy Mothers Have Healthy Children.

"Dr. Farrow's Favorite Prescription was a great help to me during pregnancy," said Mrs. W. B. Collins, 514 N. West St., Raleigh, N. C., whose picture appears above. "At one time I was in very bad physical condition—was weak and nervous, suffered from nausea, or sick stomach, and had pains in my back and every where. I also had severe bearing-down. I was in a very bad way when I began taking Dr. Farrow's Favorite Prescription and I never took a medicine that did me so much good. I got strong and well and had no more suffering. I got along fine the remainder of the time. I had practically no suffering—the easiest time I ever experienced—and I had a very fine healthy baby. The prescriptive mother will find Dr. Farrow's Favorite Prescription a wonderful help."

Start at once with this "Prescriptive" and see how quickly you pick up—feel stronger and better. Write Dr. Farrow's Invaluable Hotel in Buffalo, N. Y. for free advice.

Singing at Mt. Mariah every Saturday night. Everybody come and make it interesting.

Mr. Ollie Johnson of Copperhill visited homefolks Sunday.

Mr. Hurschel Wallace left recently for Kentucky.

Messrs. Jim and Ralph Warren spent last week with Mr. John Warren.

Mr. Loyd Patton had the misfortune to get his hand badly cut last week while cutting wood.

Some of the young people from this place attended the all-day singing at Shady Grove Sunday and reported a nice time.

Clean Up and Feed Up

When you clean up your pantry restock it with our Snowdrift Flour, and our fresh unbolted Corn Meal

And when you clean up your feed house, restock it with our Hay and Feedstuff.

When in need of anything we carry, call Phone 44

Murphy Mills
