on the road. She said it was a days trip over trails into Asheville, it being necessary to walk some of the way. That now one could with ease drive over in an hour and a half. That it was possible to come over to Bryson in a little over five hours and enjoy the scenery, from Burnsville. Mrs. A. M. Frye also welcomed the guests to the Inn and said she felt that it was good for all to get together and learn of the work of the other sections. Judge Underwood and James Davidson, editor of the Cleveland paper, made short talks as did Mayor Whittaker of Andrews, S. J. Busha, of Buford, Ga., Mr. Sipe, of Murphy, O. J. Willoughby, of the staff of the Atlanta Constitution, and others. A committee was named by Mr. Marvel to select a state vice president for the Association. Otis Green of Asheville was named as vice president and Mr. Wythe M. Peyton as secretary.

The visitors were guests of Frye-mont Inn, the Bryson City Chamber of Commerce and the Civic League. A most delicious dinner was served by the local organizations. We hope that our guests will return again and enjoy the beauties of this section.—Asheville Citizen.

Small Still Captured Saturday By Officers

The smallest illicit distillery outfit ever captured in the county was taken Saturday afternoon about 4:30 o'clock, by Chief D. M. Birchfield and Deputy J. A. Cearley on Marble Creek about one and a half miles north of Regal. The outfit was of four gallon capacity, and had been in operation sometime during the day. One barrel, containing 30 or 40 gallons of beer, was destroyed. No arrests were made.

The outfit is said to be the smallest ever captured in the county, and was complete in every detail. The "cap" was about the size of a quart-tipper, and it is estimated that only one quart of liquid moonshine could be made from one "run".

Decoration Day At Birch Sunday

Sunday, May 30th, was decoration day at Birch. All day exercises were enjoyed by a large crowd. The graves were literally covered with flowers. The program as carried out follows: Fine singing by the choir. Welcome address by Thomas Payne. Services conducted by Rev. W. D. Hogsed and A. Green. Splendid talks were made by W. W. Barton, W. D. Hogsed, E. A. Voyles, Neal Reese, S. T. Mings. Then came the address by Bascomb R. Carroll, who splendidly and nicely spoke for some time on the subject: "Behold Thy Mother." His address was well delivered and was worth while for any one to hear. We hope he will come back and speak to us any time.

Progress of the Rockefeller Demonstration

With the organization completed and the workers actually in the field in Cherokee County, the State Board of Charities and Public Welfare can announce that the "Four County Demonstration" is functioning in all four counties, viz., Wake, Chatham, Orange and Cherokee.

It will be recalled that it was at a meeting of the Executive Committee of the Laura Spelman Rockefeller Memorial held in New York City, August 16, 1924, that resolutions were passed appropriating \$10,000 a year for three years to the State Board of Charities and Public Welfare, and a like amount to the School of Public Welfare, \$60,000 in all, to be used jointly in demonstration work in four counties of the state.

Apparently the work has progressed slowly, but more has been done than appears on the surface. Miss Lily E. Mitchell, supervisor of case-work for the demonstration, spent about five months in the Wake County office arranging office records and installing a complete and workable filing system. She also supervised all case-work, including the fieldwork of a class in the School of Public Welfare at the University during the winter quarter. This class did field work in Wake County.

Mr. H. D. Farrell has been employed as probation officer for boys in Wake County. Mr. Farrell has been doing part-time work, as he is taking his degree at the University this year. After the commencement in June, he will be on full time.

The work in Wake County is under the general direction of Mrs. T. W. Bickett, for the county.

Lieut. Lawrence A. Oxley, Director Bureau for Work Among Negroes, is working under the memorial fund. Lieutenant Oxley has been doing rather intensive work in Wake County, but has found time to make several surveys of negro conditions in various sections of the State which show his ability as a social worker. He will not confine his work to the "four counties."

Miss Anne Ruth Medcalf, who is ing graduate work in the School of Public Welfare, has been chosen temporarily as superintendent of public welfare for Cherokee County. Miss Medcalf has considerable experience in rural mountain problems, and the State Board is fortunate in securing her. Miss Mitchell is now in Cherokee assisting Miss Medcalf in planning and starting the work.

The work in Orange and Chatham has not progressed to the point of appointing a fulltime superintendent. Mr. George H. Lawrence, who is doing some work in the School of Public Welfare, is doing welfare work in the two counties. It is expected that full-time work in these two counties will soon begin by a cooperative agreement between the State Board, the School of Public Welfare, and the county officials.

At the University the fund is maintained in the making and filing of taining an office secretary, who is records. This office will be of much use and benefit to the superintendents attending the summer institutes and to students in the School of Public Welfare. A filing clerk is also employed in the office of the State Board.—Public Welfare Progress.

X-RAY FILM BY WIRE SENT IN 7 MINUTES

New Feat of Science Suggests Great Boon to Surgical Patients in Small Communities.

Surgical and medical men see wonderful possibilities in the successful transmission by wire of an X-ray negative, which has just been accomplished between New York and Chicago. The X-ray film, showing in detail the bone structure of a human hand, was sent by wire in just seven minutes, and when developed at the Chicago offices of the Victor X-ray Corporation it was a perfect reproduction of the original.

The great benefit to medical practice which this achievement foreshadows is the possibility of bringing the services of an X-ray specialist to a patient in a far-distant small town or village where such a specialist could not usually be found.

By means of the Coolidge portable X-ray, brought out a few years ago by Dr. W. D. Coolidge, of the General Electric Company's research laboratory, an X-ray picture could be taken at the bedside of the patient. This could then be sent by wire from the nearest sending station to a receiving station in a large city and then shown to an X-ray specialist who could make a diagnosis and wire back instructions for treatment.

Such a great saving of time as this in securing expert advice would undoubtedly prevent many patients from becoming permanent cripples.

Sending stations at convenient points all over the country will be necessary. These, it is predicted, will be established within a few years.

Mr. John Cole has now about all of his saw mill moved to Mrs. Mat Withrow's place where he is to saw her timber. He hopes to be sawing in a few days.

Everybody present at the singing at Mr. W. A. Burgess' Saturday night seemed to enjoy it.
