## The Cherokee Scout

She stared, round-eyed.  
"I reckon you're a gambler!" she accused.

"I am seeking health in the West," I said, "where the climate is high and dry."

"My Gawd!" she blurted. "High and dry! You're goin' to the right place. For all I hear tell, Benton is high enough and dry enough. But laws sakes, you don't need to go that fur. You can as well stop off at North Platte, or Sidney or Cheyenne. They'll sculp you sure at Benton—unless you watch out mighty sharp."

"How so, may I ask?"

"You're certainly green," she apprised. "Benton's roarin'—and I know what that means. Didn't North Platte roar? I seen it at its beginnin's. My old man and me, we were there from the fust, when it started in as the railroad terminal. My sakes, but them were times! Gamblin', shootin', drinkin' and high-cock-alorums night and day! 'Twasn't no place for innocence! Easy come, easy go, that was the word."

## What Price Beauty?

by Miss Flo

### AS OTHERS SEE YOU

A brand new mirror has been invented. It's a magnifying mirror for the dressing table, and looks like any other mirror. It may be had in your favorite color with powder box to match—that you may carry out the decorative scheme of your dressing table. But when you look into it—well, watch out for a shock—because it magnifies!

Instead of seeing a perfect example of the skin you love to touch, you will see all the tiny lines that are coming—all the spots and maybe freckles—all the moles; in fact, everything that is there and shouldn't be.

All of which serves to remind us of the real importance of a good mirror, not necessarily one that magnifies but one that makes it possible for us to see our skins as they really are and keep a check on the blemishes that mar its beauty is all that is necessary in the majority of cases. The next essential is the light, which must be clear and strong. Shadows have a way of flattering and deceiving—and illusions are quickly destroyed in strong light.

Choose a hand mirror of generous size—not too heavy and with a handle that may be easily held. An oval shape is to be preferred to an odd or fanciful one—and the round mirror is always the best—even though at the present time it seems a bit old-fashioned.

And remember that the mirror must not be just a decorative ornament. Make a habit of using it regularly—for studying good points and bad points of the face, lines of the head, arrangement of the hair, profile, etc. It will serve as a friend and warn you of disfiguring lines and blemishes in time to avoid them, and teach you to play up your good points against those that are not so good.

And, while we are on the subject, don't overlook the importance of taking careful note of the back of your head each time you dress. This is most important, for although you may not be conscious of it, other people look as closely and critically at the back of your head as at your face. A beautiful arrangement of the hair over the face cannot excuse straggly wisps of hair and a crooked part in the back.
