Additions and replacements to the
Southern Bell Telephone System this
year will cost more than \$29,789,000.

This is one of the largest telephone
construction programs ever undertaken
by this company and follows an ex-
penditure of \$33,226,300 for similar purposes
during 1926.

The new plant is designed not only to
meet the needs of today, but to provide
facilities to care for the anticipated
growth of the near future.

The constant additions to the telephone
plant have greatly increased the invest-
ment per telephone, making it necessary
to earn greater revenue per telephone in
order to meet the growing cost of pro-
ducing service and have a balance for
profit.

Our effort to keep pace with the growth
and progress of this State is witnessed
by the construction work now under way.

Our success in measuring up fully to
our serious public responsibility depends
largely upon your friendly interest and
encouragement.
