#### Murphy Boy Witness As Train Kills Man

Charles Floming, of Murphy, testi-fied to the accide tal derth last Tues-day of Robey Hab, 20, of Lenior, who was killed by a freight train.

Fleming, Hall and two other boys were running to jump on the train when Hall was killed, the Murphy boy told the coroner following the

#### **Bluestone Produces** Big Gladiolus Yield

A few pounds of copper sulphate spelled the difference between the success and failure of gladioli raised by John Nuckson, florist in New Hanover County.

He had found it almost impossible to raise a good crop of these flowers, he told L. G. Willis, soil chemist of the N. C. Agricultural Experiment

Willis told bim his soil was deficient in copper sulphate, one of the rare elements not supplied in regular fertilizer.

So Nuckton added copper sulphate So Nuckton added copper sulphate or bluestone, to one of his plots at the rate of 25 pounds to the acre. The cost was only \$1.50. On three other plots he added only the customary fertilizer without copper sulphate.

Nuckton said the variety of glad-iolus planted, known as Mrs. Frank Pendleton, is an old one that is "pet-tered out," and not much is expected

of it any more in that section.
"However," he said, "on the lot
where I used copper sulphate, it where I used copper sulphate, it has made a lot of Not one spikes, while on the other three lots, where no copper sulphate was applied, the gladioli were very poor looking, full of rust, and had only a few spikes."

The treated plot produced large, well developed plants, while the untreated plots produced only small, runted, sickly looking plants. Willis stated

Willis has been making special studies of rare elements in Carolina soils. He has found that in places there is soils apparently full of rich plant food, but deficient in one or more of these rare elements and therefore incapble of producing strong, healthy plants.

When Mrs. J. C. Clastner of New York told her husband that she had spent the evening at the home of friends where he had himself been visiting, he started an investigation that resulted in a divorce.

A verdict of one cent and cests was given Miss Mary Tatalana of Bal-timore when she sued Charles Brown of Belair, Md., for \$10,000 for breach

uests of Mrs. Blane Cole Sunday Mr. Sam Plemmons, of Tellico Plains was the Sunday night guest of Mr. Roberson's sister, Mrs. Clifton Henry of Suit. Sunday

# GOOD LIGHTING DOES THIS...

YOU may not realize it, but reading a newspaper in poor light is a hard visual task. The combination of small type on newsprint makes for poor visibility. Good lighting can greatly improve this. For scientists say that good light "magnifies" newspaper type . . . makes it easier to read . . . by increasing the visibility of the black type and the gray-white paper.

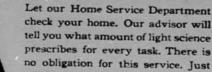

You'll enjoy your newspaper more with good lighting. To reduce otherwise annoying contrasts be sure to have other lights burning in the room. You'll also save yourself possible eyestrain, headaches, and fatigue by reading only in good light. Try putting a 75 or a 100-watt bulb in your favorite reading lamp tonight, See what a difference it makes!
