# Can Your HOME Stand the TORTURES of WINTER?

IT ALL DEPENDS ON THE WAY YOU HEAT IT.... and in itself, that is no problem. . . Simply, start off on the right foot by using **ELECTRICITY**.

It has the cheapest original cost, the most economical operating cost and without doubt is the most **CONVENIENT** method you could possibly employ.

To begin with, **ELECTRICITY** is very cheap—the cheapest it has ever been in this entire section . . . and we are very lucky because we are the only people in North Carolina enjoying these cheap electric rates. Enjoy them because they are **YOURS!**

**THERMADOR HEAT FAN**  
\$20.00 to \$82.00

**THERMADOR SPRED RAY** ..... \$6.95

The extra **CONVENIENCE** of electrical heating is well worth the small amount invested. You don't have to build a fire, or expose yourself to the cold by rising out of a warm bed, or going outside for fuel. Just plug in the nearest socket and let Electricity do the rest! And electric heaters are portable too! . . . You can move the small, light heaters from room to room, and use them for all heating purposes.

**ELECTRICITY IS CHEAP!**
