**Expert Tells Two Ways To Ease Feet In Fields**

For foot comfort: Put a little piece of lamb's wool between your toe to prevent soft corns forming if your work requires long hours of standing.

Try this when you're gardening: Take a good piece of wool cloth scrap from an old suit or coat. Trace the outline of your shoe sole on it and then cut it out one-fourth inch smaller. Place this wool scrap smoothly in the bottom of your shoe and you will find it, not only a soft cushion to stand on but also a protection from dampness and cold.

## State's Magic Eye Shows Auto Travel Is Decreasing Fast

"Magic-eye" traffic counters placed at strategic points along highways by the state are showing that motor travel is dropping off considerably as compared with the same spot of road a year ago.

Averaging findings on 24 highways shows a decrease for March of 16.1 per cent over the same month in 1941. During February the decrease was only 9.3 per cent as compared with February, 1941.

These traffic counts are for the rural area. James S. Burch, Statistics Engineer for the Highway Commission, believes urban traffic decrease is slightly higher. Burch also said that "from information we have it is believed county roads are off more than main highways".

One of the largest decreases in traffic is on U. S. 1 north of Raleigh where a 20.6 per cent decrease was registered in February and a 21.4 per cent decrease in March over the same months of 1941. Burch suggests that this decrease is caused primarily by the decrease in tourist travel.

Estimating just how much more travel will decrease by 1943 is about like estimating when the present war will end.

## NEW DRAFT CALL SENT TO COUNTY: MEN GO IN MAY

**Former Classification Lists Being Studied; —May Be Revised**

Another call for men to be sent to the army has been received by Secretary Walker, of the County Draft Board, and those whose numbers have been reached will be notified within the next few days.

Censorship forbids stating the number to be taken, but it may be stated that the group will be about the same size as the others that have gone.

The men will not be required to leave until the middle of next month.

Thus far, calls have been received only once a month and on several occasions this county has been passed by because of its many volunteers. From now on, however, it is not unlikely that there may be two calls a month. Volunteers, now-a-days are few and far between in the county—although in the big cities, they are reported to be on the increase.

Word comes from the Navy that any man subject to draft may enlist in that branch of the service, if he prefers, provided his number has not actually been called.

Meanwhile the County Board is reported to be making a careful study of all draftees who have been given deferment because married or for other reasons, and there may be a reclassification. Rules have been tightened so that deferment is often being denied a married man if his wife is able to support herself.

Also a plan is now being formulated in Washington whereby married men may be drafted into the service even though their wives are unable to support themselves. In such cases support would be supplied by a special Federal allotment.

**Tires Are Available For Most Farmers, Says State Expert**

Farmers can qualify for new or recapped tires, and new tubes providing they use their trucks or cars to haul produce to and from the market. This includes the transportation of fuel for farm machinery, fertilizers, and feeds to the farm.

On the other hand, no new tires will be sold to farmers for trucks that are used to carry products to housewives or other ultimate consumers.

The term "truck" includes pickups. Farmers are also eligible to get new tires for their tractors and other farm implements, providing they are not changing from steel wheels to rubber tires.

Farmers who use their passenger cars to haul produce to and from market because they have no other practical means of transportation, are eligible to have tires recapped or

**Notice to The Voters Of Cherokee County**

Having been asked by several of our leading men in the different sections of the County to run for the office of Clerk of the Superior Court, on the Democratic ticket, I have decided after careful consideration, that I will enter the race.

I ask your support, and I promise that if nominated and elected, I will do my best to give honest and faithful service.

I am a veteran of the First World War, and if they would accept me, I would not be running for any office—I would be back in the army again. As it is, I ask your vote.

to buy recapped tires.

This eligibility also applies to farm workers and technicians who use their passenger cars to travel within and to and from farms essential to the war effort.

Farmers who use their trucks for important purposes other than those that make them eligible for new tires, also may qualify for recaps. For instance, a dairy farmer who delivers milk to consumers in an isolated area might establish eligibility, this would be up to the local rationing board.

## Two First Aid Classes Planned: All Welcome

At least two First Aid classes are to be started in Murphy within the next few days, and all who are interested in entering are requested to give their names to Miss Mattie Palmer, at the Mayor's office, or leave word with their pastors. Additional classes will be started as enough students enroll.

Upon successful completion of the course a standard certificate will be awarded to every adult, and Junior course certificates will be given to children.

A first aid course will require 20 hours of class work, and will be given without expense save the cost of a textbook. Classes will be held in both afternoons and evenings.

The Murphy Chapter of the Red Cross has forty-five qualified instructors. A number of classes have already been held in the school.

**BAN**

The ban on rubber-tired tractors, effective on or after May 1, will have considerable effect on tractor design from now on and throughout the duration of the war.

Farm real estate values for the country as a whole rose about 7 per cent during the 12 months ending March 1, reports the U. S. Department of Agriculture.
