YES, WE'VE KEPT THE HOME FIRES BURNING!

But too many of the wrong kind of home fires have been kept burning for our men and women from war zones. In fact, last year these wrong fires—210,000 forest and woods fires—blackened 31,000,000 acres; killed billions of trees that would have meant jobs for returned servicemen; crippled vital watersheds; wiped out beautiful playgrounds.

Whose fault? One thing is certain—the major destruction can't be blamed (as we would like to think) on natural causes. Good, American citizens like you start the majority of these forest and woods fires. Nine out of ten, to be exact. And it's high time this fact was brought to light.

So it's up to you—and every other American—to be careful in forest areas. Please read the rules on this page. Read them again and again. Then do your part to prevent the wrong kind of home fires.

- REMEMBER THESE RULES
1. Hold your match till it's cold—then pinch it to make sure.
  2. Crush out your cigarette; your cigar, your pipe ashes. Then, when there's an ash tray, use it!
  3. Drawn your campfire and warming fire, then stir and drawn again. If no water is available, cover with clean earth.
  4. If you must use fire: Ask if the law requires a permit, burn only on still evenings; have help handy, kill every spark.

Only you can PREVENT FOREST FIRES
