This is Bernard Rawlings...

He's been "on the team" for nearly 30 years...

BERNARD RAWLINGS happens to be a clerk in our Washington, N. C. bulk plant. He might have been a tank truck driver, a salesman, a research chemist, or president of our company—the basic story would run the same.

He came to work for Standard Oil of New Jersey years ago. His work has been steady and his pay has been good. At 65, he'll retire with a life income under the company pension plan. In the Thrift Plan, he's got a tidy cash nest-egg saved up. He's had regular vacations with pay, and special protection in case of sickness or accident.

In short, Bernard has a high degree of the things that mean most to a man with a job. He has them because it was planned that way. For over 30 years, this company's workers, their unions, and the management have worked in common agreement that people's needs as human

beings are the most important thing in the world. And it's not mere generosity. It has proved plain good business all along the line.

The average Standard Oil of New Jersey worker today has been with us over 14 years. More than 8,000 of them over 20 years. That's a lot of seasoned manpower to have on your side in the competitive business of making quality

gasoline and other petroleum products. And its benefits extend clear out to you...

Right now the whole petroleum industry is straining to meet the greatest demand for its products in all history—and this staff of skilled, experienced people is your assurance that everything possible is being done with this company's facilities to meet your needs for more and better petroleum products.

As your neighbors, too, people like these are good citizens, steady customers of local stores, steady payers of local taxes.

And year after year, as makers of products you depend on in your car or factory or home or on your farm... they're second to none in ability to give good value at modest price!
