## Reckless Passing, Driving On Wrong Side Of Road, Major Causes of Accidents

Administrative Assistant, Center for Safety Education. New

York University The latest available figures indicate that more than ten percent of the motorists involved in all fatal accidents were driving on the wrong side of the road. On rur il 100 fatal accidents can be attributed to passing too fast, too soon, too late or with too little thought. Multiple-lane express highway The inherent risk involved in

and assure himself of enough distance ahead to complete the pass. he can always swing safely back in line if necessary. In general, a clear open road of approximately 1,000 feet and an allowable time interval of 12 seconds is a safe

In addition, accident prevention authorities recommend these special precautions

I. A standing street car or bus taking on or discharging passengers should never be passed on the right unless the landing area is protected by a safety zone.

2. Vehicles should not pass on approaching curves, crests of hills, railroad grade crossings or at ony intersections.

3. Never attempt to pass vehicles that are travelling at top speed or at maximum safe speed, and never attempt to pass when the required passing speed is greater than that allowed by the local speed law.

4. Indicate well in advance the desire to pass, either by shifting position of the car into the correct one or by the use of hand signals.

is an indication of emotional immaturity and has no place in the mind of the expert driver; and the driver who makes it as difficult as possible for other ears to pass him is equally childish and dangerous. Nearly everyone has at some time been the near victim of the "caser beaver" who, due to some psychological quirk in his make-up, cannot bear to stay beand the car ahead; or the "road hog" who straidles the center line. refusing to share the highway with nyone not complying with his rescribed rate of speed. The rule keep to the right except when passing" should be authored to by all motorists, whether they are noving at 20 or at 50 miles an

### King College **Fund Increasing**

Cash and pledges of \$8,400 this reck brought the King College fund total to \$139.184 or approximately 28 percent of the requird goal of \$500,000. This was anounced by Dr. James L. Fowle Chattanooga, general chairman of he Syned-wide drive in behalf of the Bristol Tennessee, institu-

### Do Your Shoes **Fit Your Feet?**

State Home Demonstration Agent If you have a tough time break ing in a new pair of shoes don't blame it on the shoe altogether Are you sure you are wearing the right size? If you are wearing the same size you were five or six years ago your shoes may be too small.

Pediatrists say their files are full of case histories of people who have been wearing wrong size shoes for years. Your hurting, aching and tired feet may come from more than just newness of

Perhaps you would like to have these rules issued by a foot specialist when you buy your next pair of shoes: (1) Never tell the salesman your size and let it go at that. You're grown up now it's true, but your feet may have grown a half-size since you bought your last shoes. That's only onesixth of an inch, you know! (2) Have both your feet measured in a standing position. The two feet usually differ in size, and they're ionger when you stand than when you're seated

(3) Examine the materials of the

shoe earefully. Are the uppers

constrict your feet? Are the soles rouble (4) Make sure the shoes are

at the heel. You should be able to wiggle your toes freely inside ing-in trouble a-plenty.

Be sure clothes are entirely dry before packing them for summer travel, clothing specialists caution. If clothes are even slightly damp from pressing or from a humid atmosphere, they will wrineven mildew. Mildew can ruin temperatures and high humidity lothes in a hurry given dampness, wear a hat while out of doors. Jarkness, and warmth.

It's wise precaution to take a ook at stored clothing occasionalnear the seashore or in damp perspiration, varm summer elimates.

Agricultural Engineering at State

When heat illness strikes it can be serious, sometimes fatal, Mr Ellis said. Be on the guard agains' heat sickness and take the necessary precautions this summer to avoid over-exposure to the sun or hol prolonged physical exertion in extreme heat.

Heat exhaustion and sun stroke are two entirely different things, present ball grounds was played of genuine leather, flexible enough even though both may seem to reto give your feet free play? If suit from exposure to high evternot, you may be stepping toward nal heat. With heat exhaustion, the patient's skin is cold and clammy while with sun stroke, the skin is roomy in the front part and snug bot and dry. A simple rule may serve as a guide and avoid confusion regarding the treatment. the shoes. If you can't, they're Priefly, it is this: If the patient is too short, and you'll have break- cold, make him warm; if he is hot, make him cool

You can protect yourself against beat sickness by following these National Safety Council recommendations:

Avoid overexertion, particularly in the early part of the heat wave. Avoid too much exposure to kle badly in a suitcase and may direct sun rays, or extreme indoor

> Wear light, porous clothing and avoid tight fitting clothes.

Increase the use of salt on food, y during the summer to be sure or use salt tablets or salt in drinkno mildew has started. This is a ing water to offset the excessive ip especially for those who live loss of salt from the body through
