Why a short trip means better hay...

DEARBORN SIDE DELIVERY RAKE

moves hay only 8 feet—saves more leaves

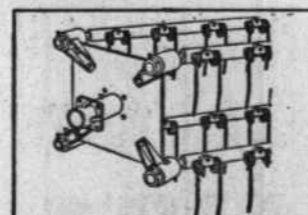

Naturally, the less hay is handled during raking, the better that hay is going to be. And because it moves hay about 8 feet on the average, instead of the usual 11 feet, the Dearborn Side Delivery Rake goes a long way toward making a more profitable crop.

THE GENTLE ACTION of the Dearborn Side Delivery Rake means less scattering or shattering the crop. With its smooth reel action and shorter movement of hay, this implement gently turns hay over, tucking the leaves inside—exposing the stems to sun and wind for quick, thorough curing. The result? Better, richer hay that's more valuable to you. And because the Dearborn Side Delivery Rake works fast and is easy to handle, you make the most of your time and the weather.

LEARN MORE about this star performer—and its dependable helpmate, the Dearborn Rear Attached Mower. You'll find that both can put you money ahead on hay making. Convenient credit terms available.

Start and stop rake from tractor seat. Pull a handy rope and a spring loaded throw-out clutch starts or stops this rake's ground driven reel.

Smooth running—ball bearings on reel and tooth bars assure smooth performance of the Dearborn Side Delivery Rake... mean lower maintenance costs and longer life.
