Greatest Gasoline Development in 31 Years

TCP, a Shell discovered additive, now blended into Shell Premium Gasoline, puts an end to greatest cause of power loss. Actually boosts power up to 15%, spark plug life up to 150%, by counteracting the deposits on spark plugs and in combustion chambers.

ignition of the combustion mixture. This means, for the average motorist, a power boost of up to 15%, an increase in spark plug life of up to 150%, plus an increase in gasoline mileage!

Shell Premium with TCP is the most important advance in gasoline since the discovery of tetraethyl lead in 1922.

Shell Premium with TCP quick to act

So rapidly does Shell Premium with TCP counteract the deposits on spark plugs and in combustion chambers that you'll feel your engine's had a tune-up before you've finished the second tankful. You enjoy that new car pep again.

NOW IN YOUR TOWN but only at your Shell Dealer's

TCP (a Shell Trademark) was originally developed by Shell Research for aviation fuels and until now has been largely restricted to military aircraft.

Today, Shell Premium with TCP is available in this area, but only at Shell Dealer Stations.

Though you may not realize it, the chances are that your engine is delivering far less than its original horsepower.

This is because, in the average engine, deposits constantly build up on spark plugs and in combustion chambers. These deposits actually "short-circuit" your spark plugs causing them to misfire. They may also cause pre-ignition of the combustion mixture—resulting in severe knock. This is especially true when accelerating, climbing hills, or driving on the open highway.

This condition exists in the majority of cars on the road today.

To overcome this condition, Shell Research discovered a fuel additive, TCP. Blended into Shell Premium Gasoline, TCP stops the short-circuiting effects of the deposits on spark plugs and controls pre-
