# New County Dairy Association Should Meet With Big Success only kind of insurance capable of doing that is the kind that covers

Cherokee County dairymen took a big step this week toward estabfishing healthy economic footing for the county's dairy industry.

During an organizational meeting, H. N'. Wells was elected the first president of the Cherokee County Milk Producers Association. The association has set itself up a six point program with all points aiming at the betterment of the milk producing industry of the county.

Point one calls for the promotion of dairy farming in Cherokee County. There are many first-rate, Grade A dairies in the county, but the fact that the association wants to promote dairy farming means there is room for still more dairies. With the new organization carrying out its first point, every phase of the county's economics will feel the in-

Milk checks in this county means a great deal. They are a mainstay in our economy. And with the addition of still more dairies, more money will flow through the county ..

Point number two, we believe is one of the main projects of the organization. The second project will be the promotion and sale of Cherokee County produced milk and dairy products. With home grown dairy products now equal to or better than any produced anywhere else it stands to reason that the local product should out sell all others. We want the best and should be willing to make some extra effort to specify that we want Cherokee County products. That extra effort will also mean we are helping to promote business in our own county while still getting our money's worth.

Other points in the program-all worthy of attention from the organization-include working with the N. C. State College on research; promoting and publicizing development of dairying in the county; acting as a bargaining agency for members of the organization, and cooperating with the Dairy Herd Improvement Association, Artificial Association and other groups.

The new organization is starting off on the right foot and is bound drivers and owners of motor veto meet with success if it keeps to its six point program.

# Tourist Business Must Make An Effort To Keep Tourists

Hard on the heels of the formation of a new dairy farmers organiza tion, county men and women interested in tourist trade were told they should organize to assure a good tourist year in 1954.

A committee was formed during the tourist meeting to look into the motorist that they can obtain the possibility of activating an organization of tourist businesses. The committee will also look into the possibilities of bringing Clay County into the Cherokee County organization,

The local business people were warned that tourists in 1954 will be looking for more than just a room and a place to sleep. Cherokee County-and Clay County, if they join us-must look for ways to attract and hold tourists over. It was pointed out that a tourist unit, figured at two and four tenths persons-spends from \$12 to \$25 for every day it stays in an area. Except for fishing parties that stay for more than one day, area tourist business have missed that money spent by a tourist unit.

Fred Whitaker, head of the State Tourist Bureau, pointed out that this county could tie in with "Unto These Hills" since the "Trail of plead for leniency. It cannot be Tears" started in our county. He said the research department of the Cherokee Historic Association has all the needed information for Fort local newspaper and listen to the

A tour of sites in and around the county, with Fort Butler included, would mean a great deal toward keeping those tourist units more than one night in this section.

NOTICE OF SERVICE OF PROCESS BY PUBLICATION

provisions of our new law. The damage claims arising ou tof a motor vehicle accident. We have been informed by other states having this same kind of law that many of their motorists got into hot water because they thought their collision or fire insurance sufficed; a few even banked en their life insurance. None, of course would pay aff traffic accident damage claims brought by others."

"Our new law says, without attempting to repeat legal terminology, that the security requirements shall not apply to the operator or owner of a motor vehicle under any of the following conditions:

To the operator or owner if the owner had in effect at the time of the accident an automobile liability insurance policy with respect to the car involved.

To the operator, if not the owner of the vehicle, if there was in effect at the time of the accident an operator's liability insurance policy or bond with respect to his operator's liability insurance policy or bond with respect to his operation of motor vehicles not owned by him.

To the operator or owner if the liability of such operator or owner for damages resulting from an accident is, in the judgment of the Commissioner of Motor Vehicles, covered by any other form of fiability insurance or

bond." "The first policy is the kind that is commonly carried by an insured owner of a private passenger car. The second is the kind that is carried by persons who drive but do not own motor vehicles. The third applies to forms of liability insurance that are carried only by business and industrial firms. All, it should be noted, protect the public against damages caused by the hicles."

"It should also be remembered of course, that the law gives uninsured drivers, who are involved in accidents, 60 days in which to furnish proof of nonliability, make satisfactory arrangements for the settlement of claims or deposit security up to \$11,000 to cover claims for damages they cause, before their driving license will be suspended."

#### (Continued from page 2)

an official leaflet, giving more details about the law, from any gasoline station without cost, He also promised to keep the public informed through the press and by radio during the remainder of Dec ember. Concluding his address, he

"It must be entirely clear to all of you that this law has real teeth. It doesn't tell the Commissioner of Motor Vehicles what he may do. It tells him very plainly what he must do. You may be sure that he will do exactly as the law directs. No motor vehicle owner or operator will have the slightest ground to complain, after January 1, that he did not understand, and granted. So I urge you again to get one of the leaflets, read, read your radio. This law was not written to punish people, but to protect them. We at the Department of Motor Vehicles, will do our best to have it operate that way."

In North Carolina the average of all beef cattle prices dropped from \$24.20 per hundred pounds in April, 1952 to \$12.20 in September, 1953. .

North Carolina milk producers received 10 to 20 per cent less for ungraded milk this year than during 1952

Six inches of clean, dry litter on the poultry house floor insures healthier chickens.

Dear Santa. I am seven years old and in the

second grade. I want you to bring me a book, big doll, typewriter, record player, chair and desk.

Santa, I have been real good in school and at home, too. You will find plenty of cake and coffee.

Your Friend. Mary Ruth Luther Marble, N. C.

# **Polio Vaccine Tests Be Made**

A nationwide study to determine the effectiveness of a polio vaccine in preventing paralytic polio will get underway in one or more southern states during the week of February 8, 1954.

Prior to this date, Dr. Jonas E. Salk, Research Professor of Bacteriology at the University of Pittsburgh—the research grantee of the National Foundation, who developed the vaccine-will have resumed his immunization studies in Allegheny County, Pennsylvania with vaccination of 5,000 to 10,000 additional children. This was aninced today by Basil O'Connor, president of the National Foundation for Infantile Paralysis.

In a gradually expanding program, more than two hundred counties throughout the United States will be involved before the mass vaccination project ends by June 1, 1954. During that period, 500,000 to 1,000,000 school childen of the second grade will have aken part in one of the largest studies of its kind ever undertaken.

Participation will be on a volintary basis with the consent of the child's parents or legal guardians. Final results of the evaluation study are not expected until some time in 1955.

In general, school children of the second grade will be vaccinated during a non-epidemic period and then observed during a subsequent polio epidemic to evaluate the protective effect of the vaccine. The basic factor for determining the protective effects of the vaccine will be a comparison of the incidence of paralytic polio in the vaccinated group with that of children in the first and third school grades.

In announcing the vaccine study, Mr. O'Connor emphasized that the uniqueness of the project was not merely its size. "For the past sixteen years," he said, "millions of Americans have actively supported scientists in the laboratory helping them create this new potential weapon against polio, And now they will continue that cooperation and help prove whether we have really reached our goal-the conquest of polio."

In the counties selected for the study, local physicians will administer the vaccine under the supervsion of the county health officer. Members of the National Found-ation's 3,100 chapters will participate as volunteers in providing the many non-professional services required in the mass vaccinations.

### **One Human Race**

Lesson for December 13, 1953

You can try a little experiment day school class. Ask each one to think of a human being, any hu-man being. Write it down if they like. Then go around the circle beings they picked. It's a safe prediction that most of them will

have selected a human being of their own race, somebody rather like them instead of someone different from them. In other words, when we think "human being" we think "somebody like me." Or in still

Dr. Foreman other words, we think of ourselves as the "normal" human being and other kinds of people as "off-brands."

#### What Do You Mean by "One"?

The truth is that it really does am in the 5 grade and bring my, take all kinds of people to make a world, hard as that is for everybody to believe. Furthermore, with all the bewildering differences there are in language, looks, culture, manners and morals, the human race is one. If there is anything quite clear in the New Testament, this is it. All human beings are human, not one is subhuman. If other races seem peculiar to you, so peculiar you even wonder why God made them, remember you seem just as pecu-

> But what is the .... human race? It is true, all of us in the big collection of living animals called "mankind" have many points in common that are not very important, some that are not important at all. We all walk on two legs, not four-but so do penguins. We all know pleasure and pain-but so do cats. We must all die-but so must grasshoppers. We all came, probably, from the presumably did catfish. There is something far more important than our brain, our hand, our nervous system or our digestive tract that marks us as one race. It is the fact which only religion acknowledges, but a fact of deepest importance: We are all children of God and made in his image. God made us of many kinds; but he also made us "of one," in unity, for unity. We are one because there is one "Lord of all."

#### If he, Then What?

If the oneness of the numan race is taken seriously, then some practical results follow. This is not all theory. It is something we can live by. For one thing, whenever we have any contact with any human being we have to re-member that he is a human being, and that so far as we are concerned that is the most important fact about him. He may have a different color, he may talk in strange gibberish, his customs may seem to be topsy-turvy, he may not know how to eat with a spoon. His ideas may be quite the reverse of ours, his religion may be weird nonsense and his whole mental workings as hard to follow as the flight of bats.But nevertheless the thing that unites him with you is more vital than the things that mark him off from you. You belong to the same hu-

man race. Further said above. L human race its unity is the fact that we are all creatures of the same Father-God, then in all dealings with other people, even when they misunderstand God (as fetishworshippers do) or even deny his very existence, as most Russians we must remember always: Their God and ours are the same. They may not know it, but it is so. All this adds up to the point that we have no right to despise or look down on any member of the human race, -nor they on us. At the foot of God's throne we all are on level ground.

### Even A Saint Can

Forget This s tells One of the Bible of an incident in the life of St. Peter. God had already shown him, as it were by a miracle, that "God is no respecter of persons," but at Antioch he forgot it. Forgot it so far that he would not even eat with some persons of a different race than his own, even though they were all Christians too. So it is easy to read these words, and it was not hard to write them. that all human beings are one. (Based on outlines copyrighted by the Division of Christian Education, Na-tional Council of the Churches of Chris-tin the U. S. A. Released by Community Press Service.)

Planned burning of sagebrush on Idaho cattle ranges has increased the grazing capacity of the land 40 to 100 per cent in the last 15 years.
