RE-ADVERTISEMENT FOR BIDS

The Cherokee County Board of Education, Murphy, North Carolina, will receive revised proposals for a school building on a site near Hiwassee Dam, Cherokee County in accordance with plans and specifications prepared by Ronald Greene, Architect, for the following work:

- (1) General Construction
- (2) Plumbing
- (3) Heating
- (4) Electrical
- (5) Excavation and Rough Grading

All contractors shall be licensed to execute work in their classifications in accordance with the laws and regulations of the State of North Carolina.

Drawings and Specifications may be obtained by licensed Contractors from the office of Ronald Greene, Architect, at 303 National Bank of Commerce Building, Gastonia, North Carolina, on Monday, January 17, 1955. A deposit of Twenty-Five dollars is required for Plans and Specifications, which will be remitted on their return to the Architect in good usable conditions.

Proposals for the above listed branches of the work will be received in the office of the Cherokee County Board of Education, Murphy, North Carolina, at 11:00 A. M. o'clock, January 26, 1955. All proposals shall be accompanied by a certified check or acceptable Bid Bond in the amount of 5% of the bid.

The Cherokee County Board of Education shall maintain the right to reject or accept any or all bids and to award all or such portions of any or all contracts as it decides.

Cherokee County Board of Education
Noah Hembree, Chairman
Lloyd W. Hendrix, Superintendent

GARDENTIME

BY ROBERT SCHMIDT

We usually think of our supply of garden plants about the time that they should be set in the garden. Then it is too late to grow our own and we must depend on commercial plant growers and seed stores for our supply. This means that we have little choice of varieties and sometimes the quality of the plants is poor.

It is not difficult to grow your own plants if you have a hotbed or coldframe available. A few plants could easily be grown in a shallow box in a kitchen window. It usually takes from five to ten weeks to grow plants from seed ready to set out in the garden, depending on the kind of crop and on the temperature and growing conditions.

Hotbeds and coldframes are structures used to grow early plants in the garden after danger of frost is over, or in some cases to give sufficient protection to certain kinds of plants to allow them to mature during the late fall or winter seasons.

A coldframe is built like a hotbed but has no source of heat except the heat from the sun's rays. A hotbed is supplied with some ar-

No Limit Set On Vegetable Acreage in '55

Tar Heel farmers can produce all the vegetables they want to this year without worrying about acreage.

Previously proposed limitations of artificial source of heat such as electricity, steam, or hot air or manure.

The frames may be covered with glass sash, cellophane, glass cloth, plastic materials or heavy muslin cloth. Glass sash are the most efficient covers, but they are rather expensive. However, if given good care they will last for many years. The kind of heat to be used will depend on what is mostly easily available.

On farms very often manure is easily obtainable. Fresh horse manure is the only kind that will give satisfactory results. Where electricity is available, that is the most efficient and dependable source of heat because it can be controlled by means of a thermostat so that the heat control problem will not be as great as in other types of beds. An electric hotbed six by six feet in size will require 60 feet of cable as a heating unit and 2 standard glass sash for cover. A hotbed of this size should grow sufficient warm season plants of all kinds for the average home garden. A coldframe without heat but with glass or other type of cover will take care of the production of most cool season crop plants such as cabbage, lettuce, broccoli and cauliflower.

This 4th day of January, 1955, Lennie Zervas, Administrator

NORTH CAROLINA CHEROKEE COUNTY ADMINISTRATRIX NOTICE

The undersigned, having qualified as administratrix of the estate of Harry Zervas, late of Cherokee County, this is to notify all persons having claims against said estate to present them to the undersigned at her home in Murphy, North Carolina, on or before the 8th day of January, 1955, or this notice will be pleaded in bar of their recovery. All persons indebted to said estate will please make immediate payment to the undersigned at her home in Murphy, North Carolina.

This 4th day of January, 1955, Lennie Zervas, Administrator

on the production of commercial vegetables, potatoes, and sweet potatoes, on acres diverted from allotment crops will not be in effect for 1955 according to a recent announcement by the U. S. Department of Agriculture.

The proposals limiting acreage of these crops originally grew out of the prospect that 1954 crops might add substantially to some serious surplus problems. The prospect of more flexible price supports next year, plus the effects of widespread drought this year, have erased these fears, Secretary of Agriculture Ezra Benson ex-

plained in announcing the change. Preliminary checks have also shown that vegetable and potato acreages were not increased in 1954 even though there was no limitation on the use of around 25 million acres diverted from allotment crops, Benson added.

With relaxation of the regulations on cross-compliance and total acreage allotments on basic crops for price support purposes, there is now greater opportunity to grow various other crops and less pressure to plant vegetables and potatoes on diverted acres, the secretary said.

WILSON IN JAPAN

Cpl. Richard Wilson, son of W. L. Wilson, Andrews, recently participated in the 187th Airborne Regimental Combat Team's "Operation Climax" on the Japanese Island of Kyushu.

Wilson, a cook in the military police battalion, entered the Army in January 1951 and completed basic training at Fort Campbell, Ky. He joined the team in December 1953.

When was the last time you drove a Ford?

If you haven't stepped inside a 1955 Ford and tried new Trigger-Torque power you don't know how much fun driving can be

Of course, you've seen it... and heard about it. But when was the last time you actually got behind the wheel and drove a Ford?

If you haven't driven a Ford lately, you're in for a thrilling experience. Ask anyone who has!

For, this Ford is totally unlike any car you've ever taken for a spin... unless you've put a Ford Thunderbird through its paces. The Thunderbird, you know, inspired the styling in all 16 of Ford's new models this year.

Inside Ford's Luxury Lounge interior you'll find fresh new two-tone colors... rich new fabrics... totally new door paneling... and a sweeping new control panel

And the way this '55 Ford behaves is something which only a Test Drive can describe. But here's a hint: Ford's new Trigger-Torque power responds to your wishes in as little as 7/100 of a second... and this power is yours in Ford's new 162-h.p. Y-block V-8, 182-h.p. Y-block Special V-8 or a new 120-h.p. I-block Six.

There are many, many more surprises in this completely new Ford. To get the full story, why not accept our invitation and take a Test Drive?

Come in for a Test Drive and you'll want to drive it home '55 FORD

With just the thought of its name...
...Your eyes reflect the anticipation of its Special Flavor
