**1955 No-Nox burns clean like this...**

**and protects your engine like this!**

Compare clean piston "A" from engine using new NO-NOX with piston "B" from engine using the "dirty-burning tail-end" of gasoline that Gulf refines out. Both pistons shown here, from Gulf test engines, ran the same number of hours under the same conditions.

**what's more... No gasoline-no, not a single one-has higher octane than**

**This is GULF'S PLEDGE to the motoring public**

- We at Gulf make this promise to America's motorists. We will not permit a single competitor—no, not a single one—to offer a gasoline superior to our own superb No-Nox.
- It is our sincere belief that No-Nox is the finest gasoline on the market today, and no matter what others do or say we will keep it the finest—in power, in performance, in engine protection.
- This is not a boast, not a claim. It is a pledge to you, the motoring public—a pledge backed by the resources—and the integrity—of the Gulf Oil Corporation.

**New 1955 GULF NO-NOX**

Always remember: Octane alone is not enough. Only a gasoline that burns clean can make its full octane power really work for you. New NO-NOX is super-refined to burn clean for lasting power. Fill up and feel the difference in:

- More complete protection than with so-called "miracle-additive" gasolines.
- Extra gas mileage in short-trip, stop-and-go driving motorists do most.
- Stall-proof smoothness... instant

**It's super-refined... to burn clean!**

The '55 gasoline for all high-compression engines
