"A LITTLE LEARNING IS A DANGEROUS THING"

—(Author's Name Below)—
There are times when a little common sense knowledge of what to do for a trivial ailment is often effective.

But if symptoms persist, it may be dangerous to depend on a "Little Learning", of your own or a friend. Your Physician has a "Lot of Learning". It is better sense to use his knowledge.

A message from Walter M. Mauney, 'Your Pharmacist'
RECENTLY THERE HAVE BEEN CASES REPORTED OF serious consequences resulting from overdoses of medicines given to infants and children.
EVEN COMMONLY USED HOUSEHOLD MEDICINES can be harmful if improperly taken. A five grain aspirin tablet may be a poisonous dose for an infant.
SUBJECT TO VARIATION, it is important to remember that an average dose for a one-month infant is usually 1/20th that of an adult. The dose for a one-year child is about 1/7th, and for a five year old about 1/3rd of an adult.
LISTEN MOST ATTENTIVELY to any verbal instructions your Physician may give you. In case of any doubt, if he is not available, please check with us.
PHARMACISTS ARE REQUIRED BY LAW to have a complete knowledge of the safe dosage of every drug or medicine. We welcome your questions.
