COMMENCEMENT

The following days will be happy, but yet sad ones for the seniors. They have almost reached the day that they have held as a goal for twelve years.

The baccalaureate sermon will be held Sunday evening, May 13, at eight o'clock. The Rev. Jackson of the Andrews Church of God will be the guest speaker. Graduation exercises will be held at eight o'clock on May 17 in the high school auditorium.

JUNIOR-SENIOR BANQUET

Seven O'clock!! Regal Hotel! Tomorrow night!! Yes, it is the big night every one has been looking forward to for months. You see, this is the date of the annual Junior-Senior Banquet! All the girls are off in corners discussing who they are going with and what they are to wear. The boys are talking about the kinds of flowers most suitable for such-and-such a dress.

This is the big night as far as the Juniors and Seniors are concerned. This will probably be the last social gathering the two classes will ever enjoy together again. And there is no doubt in anyone's mind that it will loads of fun.

The theme of the banquet will be "Spring Serenade". The spring theme will be carried out throughout the program and the decorations. The guest speaker will be Mr. John Parris of Sylva. Mr. Parris is the author of the book, "Roaming the Mountains".

MARSHALS ARE CHOSEN

Seven students of the Junior class have been chosen as Marshals for Commencement. These are

chosen on the basis of their scholastic record for their three years in high school.

JERRY PULLIUM, son of Mr. and Mrs. Galusha Pullium, is the Chief Marshal. ARDITH HAY, daughter of Mr. and Mrs. Tom Hay, Carolyn West, daughter of Mr. and Mrs. Venson West, WAYNE BATTLE, Jr., son of Mr. and Mrs. Wayne Battle, KATE PASSMORE, daughter of Mr. and Mrs. Tom Passmore, BOB NELSON, son of Mrs. Marshal King, and

JOHN CARRINGER, son of Mr. and Mrs. Frank Carringer are all honor students and will be Commencement Marshals.

Sub-District WSCS Meet Set In Andrews

The annual Sub-District meeting of the Woman's Society of Christian Service comprising the counties of Cherokee, Clay and Graham will meet next Wednesday, May 16, at the First Methodist church, Andrews at 10 a. m.

Mrs. D. M. Roach of Hayesville, subdistrict chairman, will preside and reports will be heard from the various organizations in this district.

Lunch will be served in the church dining room at 1 p. m.

GENERAL MEETING

Mrs. H. L. Mulkey will be hostess for the general WMS meeting of the Andrews First Baptist church at her home Thursday (today) at 2:30 p. m.

WORDS OF LIFE

is our Defender and our Advocate, and the Festival of Ascension commemorates the Day when He returned to this position.

May this be the desire of our hearts that today we may lift up our souls to our Heavenly Father in the prayer of the saints of ages past. "Grant, we beseech Thee, Almighty God, that like as we do believe Thy Only-begotten Son, our Lord Jesus Christ, to have ascended into the heavens; so we may also in heart and mind thither ascend, and with Him continually dwell. Who liveth and reigneth with Thee and the Holy Ghost, ever One God, world without end. Amen."

FCDA Trains Rescue Corps

Twenty miles from downtown Washington is the world's greatest "theater" - a gigantic stage setting without a stage, professional actors or scenario. Amidst a backdrop of "bombed-out" building ruins, volunteer "actors" and "actresses" periodically put behind the day's workaday world to become "victims" at the Federal Civil Defense Administration's Olney, Md., Rescue School.

WHILE BURNING OIL is played on stairways and other key spots in the ruins by a remote control panel, students at the national rescue school enter the flaming structures and actually rescue the volunteer "victims." Some "victims" pretend unconsciousness. Others simulate situations the rescue workers would meet in an actual civil defense disaster by becoming "hysterical," and even by kicking and fighting their way to be "rescued." Seldom, however, do professional rescue instructors standing by actually have to enter the ruins to help out their students during the "final exam" of the two-week course. And never are the volunteer victims actually in danger, for they have been placed in areas known to be safe from the hidden flaming oil jets.

Motorists Asked To Cooperate In Safety-Check

RALEIGH—Major Charles A. Speed, director of traffic safety activities for the State Highway Patrol, called upon all North Carolina motorists this week to cooperate fully with the current Vehicle Safety-Check.

Virtually every county in the State will have volunteer inspectors at one or more check lanes where motorists may have their vehicles safety checked free.

The patrol major said the Tar Heel inspection was in line with the nation's campaign to put every motor vehicle in safe condition. The vehicle-check program is being sponsored nationally by the Inter-Industry Highway Safety Committee, LOOK Magazine, and the National Safety Council. "The success of the drive calls for 100 per cent support from all North Carolina drivers," Major Speed said. "And it's to every driver's advantage to give the program his support. The fellow who takes his and other's lives in his good turn. The one who neglects this important safety measure takes his and others' lives in his hands."

In last year's National Vehicle Safety-Check, during which nearly one and a half million cars were checked, one out of five cars was found to be in need of mechanical attention, Major Speed said.

"Here in our own state," the major continued, "70 of the 1093 fatal auto crashes last year were caused by faulty brakes, lights, steering and tires.

"Many of the owners had no idea that their vehicles were in unsafe driving condition," he said. The ones who did get a safety check were lucky to make the discovery of mechanical defects in a check lane instead of a traffic lane. Many a driver has lost his life because an unsafe automobile part failed at a crucial moment."

Major Speed said that every driver should check his car for obvious danger signs whenever he drives, but such checking does not take the place of the periodic check by a trained mechanic. He urged all drivers to have their cars safety-checked this month while the vehicle Safety-Check is in progress.

J. C. O'Dell Has Birthday Dinner

Mr. and Mrs. Claude and Mary Mayfield and sons, Claude, Jr. and Johnny, visited Mr. and Mrs. J. C. O'Dell May 8, which was Mr. O'Dell's birthday. They enjoyed a birthday dinner served by Mrs. O'Dell. The home was decorated with spring flowers. The Mayfields now live in Elljay, Ga.

SOIL CONSERVATION

BY JOHN S. SMITH

Soil Conservation Service Complete Soil and Water Conservation plans have just been delivered to several Cherokee County farmers by the Soil Conservation District. These plans, worked out jointly by the land owner and the technicians of the Soil Conservation Service, are available to any farmer who desires one. They may be obtained by applying to the Supervisors of the local Soil Conservation District. Wayne Abernathy, Judd Stiles and Bill Russell are the supervisors. Farm plans were delivered to W. D. McCombs, J. O. Raper, H. E. Dickey, W. D. Townsend, J. L. Hall, James Barton and Charles Walker. Several others, including plans for Emory Sneed and Bruce West are in the final stages of preparation and will be returned to these farmers shortly.

On several farms recently, it has been shown that organic matter is a very important part of soil. Freshly plowed fields on the farms of Wayne Abernathy, Emory Sneed and W. D. McCombs withstood the recent heavy rains without any sign of soil erosion. On all of these farms, heavy cover crops organic matter in the soil. Soil which are turned under yearly to put or has a high organic matter content is mellow, and will absorb rain water as it falls, even in very heavy rains. Since the water soaks in the ground it cannot cause erosion. Another important point is that this water absorbed into the soil becomes available to plants in dry weather when it is badly needed.

On the other hand, soil which

is low in organic matter cannot absorb water very rapidly, and the water has to run off over the top of the ground. This water carries with it soil particles in large quantities. Soil thus washed off eventually ends up in Hiwassee Lake, where it is of no value to anyone. In fact, every ton of earth that washes into the lake cuts the water storage capacity of the lake by about 22 cubic feet. This is of minor importance as compared with the value lost by the farmer when a ton of his topsoil washes away.

Wayne Abernathy told of increasing the yield of corn on one of his fields from about ten bushels per acre in 1946 to 113 bushels per acre in 1949. He gave organic matter the majority of the credit for such tremendous increases in corn yields. Wayne practices what he preaches! He now has a rank stand of vetch ready to turn under on the field that produced ten bushels per acre only ten years ago.

All farmers who have tried turning under cover crops to increase the soil organic matter have found that yields can be greatly increased by this easy and cheap practice.

Gene Clayton has seeded approximately three acres of sericea lespedeza on his father's place at Peachtree. This is a very drought-resistant plant that makes valuable grazing or hay when grass and clover pasture has failed in dry, hot weather. Many eastern North Carolina dairymen are able to graze their cattle in time of drought only because they have several acres of sericea lespedeza to fall back on when grass and clover fail.

Andrews Garden Club Sponsoring Bird House Contest

The Valley River Garden Club is sponsoring a contest for Bird Houses in two age groups—ages 8 through 11 years and also 12 through 16 limit. Bird Houses will be judged May 15 at the Nantahala Power and Light Company's building.

The committee is asking for bird houses to be on display at the Nantahala Power and Light Company's office not later than on Saturday, May 12.

ANDREWS BWO

The May meeting of the Business Women's Circle of the Womens Missionary Society of the Andrews First Baptist church met at the home of Mrs. Carl West with Mrs. Edgar Wood as associate hostess on Thursday evening at 7:30.

In the 8 through 11 age limit a prize of \$5 will be given for the first prize and \$3 for second prize.

In the 12 to 16 age group a \$5 prize will also be given to the person winning first prize and \$3 for second prize.

Mrs. Charles O. Van Gorder is chairman.

NEW MEN'S SUMMER CHAPEAU HAS VIRTUES OF IDEAL WIFE

By BILL BURNER—ANS Features

SHANGRI LA, U.S.A.—Gentlemen, can your wife be submerged in water for days and come up alive, looking like a million? Is she light weight? Does she stay cool even in a heated atmosphere? Can you read the morning paper through her? Does she "dry up" as fast as you'd like and can you sit on her without crushing her? If so, she has all the virtues of a new men's lightweight hat introduced this season.

Gas, air and salt water go to your head this summer for those are the exact raw materials combined to make Dynel, the acrylic science fiber that has been woven and shaped into a handsome, revolutionary chapeau. Looks like a real straw, but the beauty of it is more than skin deep.

Lab and wear tests indicate that the new Dynel hat will stand almost anything. If you're caught in the rain, decide to wash it or get a whim for a swim with it on, it won't hurt it and it dries in nothing flat. It's so darn light you'll forget you're wearing it and the weave is so cool and "open" you can actually read this piece through it. In fact, this amazing hat is exceptionally suited for rabid sports fans and expectant fathers 'cause it snaps back into shape after excited crushings.

That old crone about "never take your best hat on a trip" doesn't stand up anymore. This lid always comes home shiny new, whether from business or pleasure excursions.

Gentlemen, if the little woman falls short of some of its virtues, don't tip your hat too carelessly—a new wife is definitely an unknown quantity.

Better you should make haste to the nearest "mad" or sane hatter in our area and ask to see the new Lee-Dynel miracle. Then, place it lightly in the little woman's hands and discreetly point out the perfections of this newest of scientific achievements, inspired, no less, by her very own wifely virtues. Now there's a hat tip that may readily be the beginning of Shangri La in your home life.

The Thunderbird's own record-setting 312 cubic inch engine can now be yours in most Ford models.

Ford goes First...with the 225-h.p. V-8

Now you can have a 225-h.p. engine with Fordomatic Drive for less than the top engine in any other low-priced car with ordinary standard transmission!

Until you slip behind the wheel and sample the sizzle of a 225-h.p. Ford V-8 for yourself, the best thrills in motoring are still ahead of you. For this mighty engine delivers performance that will set your spine atingle... performance that will recapture again the fun of driving... performance that keeps Ford the world's largest-selling V-8!

Truly Ford goes first with this 312 cubic inch engine—largest ever offered in a low-priced car. Yet, even teamed with Fordomatic, it costs less than top engines in other low-priced cars with just standard transmission!

Ford goes first with Lifeguard De-

sign, too. For example, there's the deep-center structure of the steering wheel that helps to protect your chest in case of accident... double-grip door latches to reduce chance of doors opening under impact.

As for looks, every '66 Ford took its styling inspiration from the Thunderbird. They're the most glamorous cars in Ford's field.

In economy, too, Ford goes first. In the 1966 Mobilgas Economy Run, a Ford V-8 beat everything in its class—including Sixes as well as Eights. Come in now for a thrilling Test Drive. When you return you'll understand why Ford is the V-8 with the biggest following.

In Performance... Safety Economy

FORD goes first

Now! An air-conditioned Ford costs less than many medium-priced cars! Try one today!
