### NORTH CAROLINA MEANS BETTER LIVING

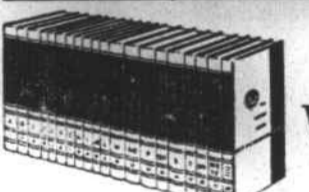

Few states are as well equipped to promote and serve the cause of scientific agriculture as North Carolina. From such tax-supported institutions as N. C. State College of Agriculture come many of the new farming techniques, new machines, new crop varieties and other developments that are being adopted by our farmers as the means to a high standard of living on the farm.

Another cause being promoted in the best interest of all North Carolina citizens is the "legal control" system for the sale of beer and ale, which has been adopted by most of our progressive communities.
