

Pembroke BPW Club encourages support for candidates to endorse ERA Ratification

At a recent meeting of the Pembroke Business and Professional Women's Club in Pembroke, the membership voted to become an official sponsor of the state organization, North Carolinians United

for Equal Rights Amendment. The NCUERA Legislative Committee has conducted a survey and mailed questionnaires to the candidates for Governor and Lt. Governor asking the questions: "Do you

support, and will you actively work for, the ratification of the Equal Rights Amendment to the United States Constitution?"

The following is the result of the questionnaire:

In June, an ERA questionnaire was mailed out to every candidate for a seat in the North Carolina General Assembly asking the same question, and a cover letter and stamped return envelope were included in the mailing. The NCUERA questionnaire focuses on a single, clearly-stated question in order to minimize the possibility that candidates might misunderstand or misinterpret the question. While the response to the questionnaire has been encouraging, all candidates have not responded. Individuals are encouraged to follow up the questionnaire with personal contacts with candidates prior to the August 17 primary.

Candidates have emphasized the importance of one-to-one contact from constituents in their own home districts. This contact can make the difference between a no and a

yes vote. The following is a list of ways in which individuals can assist the NCUERA and local organizations in supporting the ratification of the Equal Rights Amendment:

-If you don't already know, find out the names of your House and Senate candidates.

-Call them.

-Let them know that you are aware of the NCUERA questionnaire they received.

if they suggest that they need more information, forward their request to NCUERA Headquarters, 265 Spring Street, SW, Concord, NC 28025.

-Above all, let the candidates in your district know that you are deeply concerned about ERA and that you are urging them to respond affirmatively to the NCUERA questionnaire.
