## GOVERNOR JIM HUNT OVERWHELMS BOB SCOTT IN ROBESON & ELSEWHERE

**GOVERNOR JIM HUNT OVERWHELMS BOB SCOTT IN ROBESON & ELSEWHERE**  
LUMBERTON-Governor Jim Hunt easily turned back the challenge of former governor Bob Scott Tuesday in county and state-wide balloting.

Rumors swept Robeson County on the eve of the Primary that many of those professing to support Scott had defected at the last moment.

Hunt swept Robeson County with 12,263 votes to Scott's total of 4,612. State-wide he won 525,141 to 216,710.

Harry Welsh, the other candidate, polled 12,678 votes.

In the Republican Primary Sen. I. Beverly Lake polled 81% to win easily over little know C.J. "Charlie" Carstens for the GOP nomination.

Rev. E.B. Turner, the erudite black City Councilman from Lumberton's famed Precinct #9 had publicly endorsed Gov. Scott but his endorsement seemed to carry little weight. Scott polled 216 votes there but Hunt polled 529.

Another effort for Scott was made in Pembroke although Hunt prevailed handily there also. Scott did receive 315 votes in Pembroke but Hunt carried the mostly Indian Precinct with 884.

Hunt swept all 39 Precincts. Scott made his best showing in Lumberton's #1 Precinct with 351 and 315 in Pembroke.

### CARTER TOPS BALLOTING IN PRESIDENTIAL PRIMARY

President Jimmy Carter swept Robeson County and North Carolina in balloting Tuesday. He garnered 11,419 votes to 4,076 for Senator Ed Kennedy in Robeson County.

### RUN OFFS WILL BE JUNE 3

For those calling for run offs the date set for contesting them is June 3 with only those offices in precincts participating.

### STEWART CONCEDES TO LT. GOVERNOR JIMMY GREEN

Carl Stewart finally conceded to the eventual winner, Lt. Governor Jimmy Green, late Wednesday afternoon. It was a closely contested race throughout North Carolina but it was not close in Robeson County. Green won handily in Robeson County 10,918 to Stewart's 5,307.

### OTHER STATEWIDE RACES...

#### Breece Comes Up Short Again Against Thad Eure

George Breece, the young Cumberland County native, came up short again in his second bid against Thad Eure, the incumbent secretary of the state. Eure polled almost 60% of the vote total, still holding claim to the title of "the oldest Rat in the Democratic Barn." Eure will be challenged by Republican David Flaherty in the fall.

But Breece out-polled Eure in Robeson County by a 8,500 to 6,787 vote total. For instance, Breece out-distanced Eure 705 to 395 in the Pembroke Precinct.

#### John Ingram Wins Handily

John Ingram continued his winning

HORACE LOCKLEAR

J.W. HUNT

JACK MORGAN

ways with the people with his win in the Insurance Commissioner's race. Ingram won a majority of the vote, avoiding a run off against three challengers, all three of whom can claim the distinction of having worked for Ingram in the Insurance Commissioner's Office.

In Robeson Ingram polled a resounding 10,169 against his three challeng-

## PEOPLE AND LAND THINGS... C E S

### REVIVAL PLANNED

A revival will be held at the Rock of Bethlehem Church beginning May 18. Rev. Harvey Brewington will be the guest speaker, as well as Rev. Monford Locklear. Service will begin at 7:30 nightly. The pastor of the Rock of Bethlehem Baptist Church, Rev. P.R. Swett and the congregation extend a cordial invitation to the public to attend.

### GOLF TOURNAMENT

Riverside County Club and Lowry's Chain Saw will sponsor a 4 man Super Ball Golf Tournament on Saturday, May 10, tee off time is 9 a.m. Sign up time is at 6 p.m. Friday, May 9. The Tournament is open to the public. Fee is \$7.00 for members and \$12.00 for non-members. Individual trophies and gifts will be awarded to first and second place teams.

### ROBESON HISTORICAL DRAMA, INC. AWARDED \$6,000 GRANT

Robeson Historical Drama, Inc., the producer organization of the outdoor drama, "Strike at the Wind", has been awarded a \$6,000 grant by the North Carolina Theatre Arts, according to Sara Hodgkins, Secretary of the Department of Cultural Resources.

The funds will be utilized as salary assistance for the following positions: Artistic Director, Technical Director/Lighting Designer, and Costumer.

## Junior Miss and Little Miss Deep Branch Selected

"A Dream Come True" was the theme for the Little Miss Deep Branch and Junior Miss Deep Branch Beauty Pageant held Friday night, May 2.

Eyrle Ransom, teacher at Deep Branch School, was the master of ceremonies. Serving as judges were Allan W. Critchett, public relations officer of Southern National Bank, Lumberton; Teresa Oxendine Williams, a former Miss Pembroke State University and Miss Robeson County; Catherine Vaughan, retired from HEW in Washington, DC, now Director of Maxton Youth Development Organization, Inc; Betty Colville of Rowland, Title I Reading Teacher at Rowland High School; and Harold Dean Jacobs, Director of Music Education at Prospect United Methodist Church.

John N. Sampson, Principal of Deep Branch gave the welcome and introduced the master of ceremonies.

There were 12 girls vying for the two titles. Winner of the title Little Miss Deep Branch was Coretta Chavis. First runner up was Rebecca Laura Holden. Second runner up was Lucindy Locklear. The new Junior Miss Deep Branch is Teresa Carter. First runner up was Shelly Yuhus. Second runner up was Candace Lowry and third runner up was Mary Frances Locklear.

Special entertainment was by Miss Cynthia Gentry, Miss PSU, Miss Lisa Stover, Miss Pembroke Senior High, Kim Oxendine, Miss Pembroke Junior High, Little Miss Lumberton, April Locklear, Little Miss Deep Branch, 1979-80 Karen Scott and Junior Miss Deep Branch 1979-80 Barbara Brown.

## STERLING JONES' ENERGY MACHINE

by Bruce Barton

Sterling Jones is an inventor. If his latest invention works it will revolutionize the world. He calls his latest invention an Energy Machine.

He has invented an Energy Machine, an energy producing machine which, when perfected, will return Arabs back to the desert and make CP & L. Lumber Electric Membership Corporation and similar utilities essentially obsolete as we know them now. He swears that the machine works; a lot of people are beginning to agree with him, including some competent engineers who have examined the device.

Jones has always liked to tinker. A few years ago he invented an ingenious rat trap that culminated in a watery death for the rodents. He is still perfecting the merchandizing aspects of what he calls the Watergate Rat Trap,

named appropriately enough in honor (sic) of the watergate political scandal which was in the news when the rat trap was invented. Jones has also worked on a unique irrigation system, among other ideas.

Now Jones believes he has invented the ultimate invention, a machine which will produce electricity for use.

The invention entails a weight driven rotary power generating apparatus that is designed to efficiently provide energy that can be harnessed and effectively utilized.

Everyone today appreciates the problems of energy faced by America and the world at large. Jones believes his invention will make America less dependent on foreign oil, thereby allowing the many billion dollars spent yearly for energy to be used to alleviate the many social problems

facing the poor people of America, especially the American Indian. Jones says, "My invention will help my people in the long run...I know it will because it will lower all of our light bills."

Most of the efforts toward solving the Energy Crisis have been in the area of conservation and trade. In the area of energy conservation and development one area that has been overlooked is the invention and production of machinery designed to deliver energy. Jones' machine, when fully developed, will look generally like a combination heat, air pump with gauges dictating the usage of the energy being produced by the Energy Machine.

Jones believes, indeed, that his machine will deliver the energy needed to make America, and, possibly the world, independent from the Arab and other oil producing countries.

He leaves soon for a trip to Washington to confer with officials from the energy department.

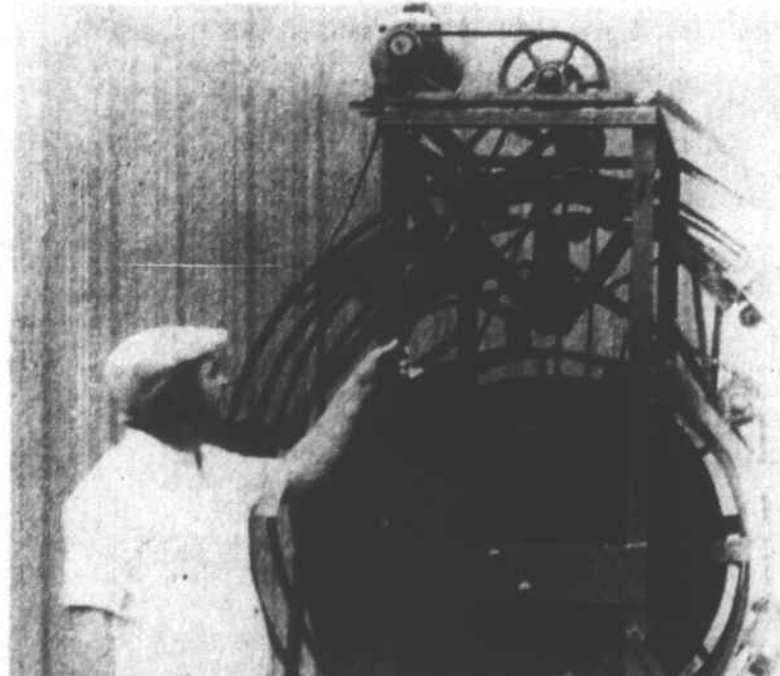

Other companies like General Electric, Westinghouse are also expected to examine Jones' machine.

Jones says, "I know this machine will work: I can see it working to save us millions of dollars in lower electric bills."

The patent for Jones' Energy Device is pending awaiting the final approval in Washington.

When perfected Jones' Energy Device could, most of all, make high electric bills a thing of the past.

Said an official with one of the local utilities, "Anything that can lower a utility bill rather than raise it, has got to be the greatest invention since Thomas Edison invented the light bulb."

Sterling Jones is shown with his latest invention: An Energy Machine.

The Performing Arts Center of Pembroke State University will be the setting for the official installation of DR. PAUL R. GIVENS (insert) as Chancellor
