Children from families whose income is at or below the levels shown are eligible for free or reduced-price meals or free milk. In addition, families not meeting these criteria but with other unusual expenses due to unusually high medical expenses, shelter costs in excess of 30 percent of income, special education expenses due to the mental or physical condition of a child, and disaster or casualty losses are urged to apply.

Application forms are being sent to all homes in a letter to parents. Additional copies are available at the principal's office in each school. The information provided on the application is confidential and will be used only for the purpose of determining eligibility. Applications may be submitted at any time during the year. A simple statement of income and family size is required plus a signed certification by the parents or guardians that the information provided is correct.

In certain cases foster children are also eligible for these benefits. If a family has foster children living with them and wishes to apply for such meals and milk for them, it should contact the school.

Under the provisions of the policy each school principal will review applications and

739-9717 for a hearing to appeal the decision. The policy contains an outline of the hearing procedure.

If a family member becomes unemployed or if family size changes, the family should contact the school to file a new application. Such changes may make the children of the family eligible for reduced-price meals, or for additional benefits such as free meals and milk if the family income falls at or below the levels shown above.

In the operation of child feeding programs, no child will be discriminated against because of race, sex, color, or national origin or handicap.

Each school and the office of the Robeson County Board of Education has a copy of the complete policy which may be reviewed by any interested party.

The Orient must be doing something right. A Korean boy, Kim Ung-Yeo Seoul, has the highest I.Q. ever recorded: 210. And the highest average I.Q. of a national population is 106.6 for the Japanese.
