'MISS SWEETHEART' PROSPECT HIGH

Doris Ann Locklear, a Prospect High School freshman, was crowned "Miss Sweetheart" for 1981 Saturday at a FHA sponsored Sweetheart Dance held in the gym. She was crowned in intermission by Tina Es, the outgoing Miss Sweetheart, after the FHA, FFA and VICA had made the selection. Doris is the daughter of Mr. and Mrs. Less Norman Locklear, Jr. of Route 3, Maxton. First runner up was Miss Cora Lena Locklear, a sophomore and the daughter of Mr. and Mrs. Holly Floyd Locklear. Gertrude L. Locklear, left, and Hazel Brewington of Pembroke recently received a citation for catching large fish. They were fishing at Avon, NC on the pier. They received citations for their catch because it "has been judged exceptionally meritorious" by the N.C. Saltwater Fishing Tournament 1980. Mrs. Locklear caught a spot weighing 1 lb. and 9 oz. Mrs. Brewington's catch was a spot weighing 1 lb. and 7 oz. [Elmer Hunt photo]

ELEANOR BLAKELY PERFORMS AT CHAMBER FETE

The entertainment was superb Monday night when the annual Lumberton Area Chamber of Commerce banquet was held at Lumberton Senior High School. Alan Sugar, who has starred in such Robeson Little Theatre productions as "Camelot" and "Fiddler On A Roof," is always marvelous. He, of course, studied at the Juilliard School of Music in New York. Outstanding, too, were Pembroke State's own Eleanor Blakely and the husband-wife team of Anne and Bob Johnson. Mrs. Blakely is in her third year as an instructor in the PSU Sociology Department. A native of Wadesboro, she grew up in a music setting because her mother was a music major. Eleanor has 12 years of piano and is a member of the Robeson Civic Choral.

Unknown to the tremendous audience, some of the performers had been plagued with bronchitis, etc., during planned rehearsal periods and some couldn't sing the day before the big banquet. But you would have never noticed Monday night because every-

He said an overall UNC planning process is being developed.

TUSCARORA INDIAN HANDCRAFTS AND CULTURAL CENTER,

by Peggy Barton

The Tuscarora Indian Tribe of Drowning Creek Reservation have just now been chartered by the state and we are really excited about it. We already had a Charter for the Handcraft and Cultural Center. And speaking of the center, we now have handcraft classes for the school children each Monday afternoon from 3 to 6.

The students are really doing some wonderful work in the leather crafts and the baskets they have been working on are looking good.

The dance class is doing great, and should really make us proud at the pow wow.

We also have a Boy Scout Troop which meets each Monday night here at the center from 7 - 9.

Anyone interested in this fine program can find out more by coming to the center on Monday night. Or you can call 919-844-3472 from 8 to 5 Monday- Friday.

The Tribal Roll is still growing and we invite any Indian who would like to enroll with the tribe to come out to the center and talk with the secretary and she will be glad to assist you with enrollment.

Many thanks to the nice people who gave so freely of their time to help with getting the materials for the pow wow annual mailed out. We are now accepting ads to be placed in our pow wow annual and we would like to thank all the wonderful people who have placed ads with us. We really appreciate your kind-

ness. If anyone would like to place an ad with us, please call the center and we will give you all the required information. Thanks to all the nice people who have given us their support. We need your help and we appreciate you so very much.

BEAT THE PEAK.

6 A.M. TO 1 P.M. AND 4 P.M. TO 9 P.M. ARE THE PEAKS TO BEAT THIS MONTH

During each day there are times when the most people want to use the most electricity.

Heating, cooling, cooking, laundry. Everybody wants more electricity all at once.

It's called the Peak Load.

And our future electric rates are affected by how high these peaks get.

But we can beat the peak, if we'd all use less electricity during peak periods. And more at other times.

It's not easy changing when we use electricity. But if we do, the peak wouldn't go up quite so fast. And neither would the cost of electricity.
