FOUR CHANCELLOR'S SCHOLARS FROM ROBESON NAMED

One valedictorian, two salutatorians, and a National Honor Society member--all from Robeson County-have been selected as Chancellor's Scholars at PSU for the 1983-84 academic year.

They bring to eight the number of Chancellor's Scholars named for next year. Others have been from Wagram, Manteo, and two from Fayetteville.

A Chancellor's Scholar has his full tuition to PSU Paid by the University. Chancellor's Scholars do special research, present a Master's type thesis and take partin special classes and seminar. They are honored with golden honor cords being placed upon them at commencement and received special certificates with their degrees.

The valedictorian selected is Willie French Hucks, a graduate of Orrum High School who is the son of Mr. and Mrs. E.L. Hucks. He plans to major in business administration.

Hucks was the Robeson Associaton winner in the N.C. Youth Speaker's Tournament, outstanding senior, and chief marshal. He was also editorin-chief of the yearbook, secretary of the National Honor Society, class representative to the Student Coucil, and president of both the Future Business Leaders of America Club and the French

One of the salutatorians is Bruce Bell, a graduate of Magnolia High School who is the son of Mr. and Mrs. Luther Bell. He plans to major in chemistry.

Bell was president of the student council, chosen "Best All-Around" in his senior class, and selected to Who's Who Among American High school Students. He received the U.S. National Leadership Merit Award, was chosen tof he Society of Distinguished American High School Stu-

Paid Pol. Adv.

ship for six weeks in Washington, D.C. His other awards have included the U.S. Student Council Award and the U.S. Achievement Academy He was a member of the Beta Club in both the 11th and 12th

Also a salutatorian was Luanne Kennedy, a graduate of St. Pauls High School and the daughte rof Mr. and Mrs. Donald Kennedy. Her father is superintendent of St. Pauls City Schools.

A Morehead Scholar nominee, Miss Kennedy was nominated to both Girls State and Governor's School, but had to decline because of participating in the U.S. Tennis Association's Summer Tournament. She was conference singles and doubles champion in her junior year, team captain her senior year, and ranks 28th among girls 18 and under in North Carolina tennis. A member of Who's Who Among American High School Students, she has been a member of both the Junior Beta Club and Senior National Honor Society.

A fourth Robeson County student who is a Chancellor's Scholar at PSU this year is Lisa Stanley, a graduate of Lumberton High School where she was a member of the National Honor Society. She is the daughter of Mr. and Mrs. Richard A. Stanley and plans to major in busi-

Miss Stanley's activities have included being a marshal, a member of the student council, assistant editor of the annual, a member of the newspaper staff, vice president of the jaycettes, a member of the band for four years, homeroom president, and a candystriper.

PSU is proud to have all of these as Chancellor's Scholars for this program entering its third year.

PROPOSAL WRITING

**WORKSHOP TUESDAY** A reminder that a Proposal Writing Workshop for grants will be held Tuesday. June 21, at PSU. It will take

Building 211.

From 9:30-10:45 a.m., Dr. Leon Rand, PSU vice chancellor for academic affairs, will speak on "The Proposal Writing Process.'

From 11-11:30 a.m., Dr. Dalton Brooks, PSU director of institutional research, will address the topic: "What To Do Before You Apply: The Application Phase

From 11:30-noon, Dr. Richard Pisano, PSU director of Institutional Advancement, will speak on: "Sources of Foundation Funding."

In the afternoon from 1-3 p.m., a panel discussion will be held with the following taking part: Dr. John Wolfe. Chancellor's Office, Fayetteville State University; Dr. Quentin Lindsey, executive director, N.C. Board of Science and Technology; Henry Helms, special assistant for federal programs, N.C. Department of Public Instruction; and George Penick, assistant director, Babcok Found-

DR. REISING'S REVIEW IN PUBLICATION

Dr. Robert Reising, English professor at PSU, recently wrote a review which appeared in the May issue of 'College Composition and Communication." It was his commentary on "Research in the Langauge Arts: Language and School," edited by Victor Frocse and Stanley Straw and published by University Park press in Balitmore.

AMERICAN INDIANS **BEFORE COLUMBUS** 

An additional course entiteld "American Indians Before Columbus," AIS 358, will be offered July 6 to Aug. 9 at PSU. Taught by Dr. John Rimberg, it carries three semester hours credit. The course will be taught at noon Mondays through Fridays. Those wishing to use it for teaching certificate renewal should contact thier principal.

**SUMMER CAMPS** SUCCESSFUL

Youngsters were every where, it seemed, at PSU during the past week. Eightythe Encampment for Citizen- the Business Administration pated in the All Sports Camp with all God's children. Eye

hath not seen, nor ear heard We've enjoyed a week of what the Lord has in store for Vacation Bible School, We all those who will be faithful had great attendance. Proud

Q,R,Z,N,BF

MAYBE YOU COULD

till the end. Trying times are here to stay till Jesus makes His return. The life of Job is a great example to us. We can serve God. It takes determination. Let's hold on. It won't be long till Jesus comes. Let's be ready. Heaven will be worth everything we go through here. Just to be able to hear Jesus say, well done, will be wonderful far beyond our explaining. Peace. It looks like everybody would want to go to a place of peace. Pray for all the sick. Mrs.

Fannie Lowry is doing better but still needs our prayers. Mr. Johnnie Wilkins is in Southeastern General Hospital. He needs our prayers. So many more.

Pray for the ones who have lost their loved ones. I know they're in trouble. I've gone through losing ones you love so much. It's heart breaking. It comes to everyone sooner or later. So be concerned. Just think-it could be you.

I was really proud to have my daughter, Rose, home this life's race will be won and the week. She works for Mr. Jessie Oxendine who is owner of a couple of drug stores in Charlotte. She loves her job and I I believe Mr. Oxendine loves her work. She's worked for him for quite some time now. Mr. Oxendine is a native of the Pembroke area, but makes his home in Charlotte. All the workers seem to be real nice people. In visiting with her and the drug store, I learned a great deal about the attitude of people. All I met there were nice. Well, Rose, hope you enjoyed spending your vacation with your family as much as we enjoyed having you. Just keep us all on your prayer list.

Mrs. Willard (Pearl) Locklear along with her son, Dwayne and his wife took a vacation in Indianapolis, Ind. visiting with her son, Doctor Jimmy Locklear. While there they visited the Five Hundred Roise on Mememorial Day. In talking with Mrs. Locklear I learned her son, Dr. Jimmy Locklear, is now a heart doctor. She's proud of him. So am I. I'm proud of all our Indian young men and women who go out to make a great future for them-

selves. So many of our young people have turned to drugs for their future. My hat is off to every one who finds they can do something to help people instead of something to make their parents worry. .. shed tears and spend sleepless nights. If Mrs. Locklear sheds tears, I feel it is tears of joy. Proud of you, Dr. Lockof people.

a home, too.

THOUGHT FOR TODAY In reading my Bible today, I find it says fret not thyself because of evil doers. Psalms 37:1. Prayer is the key that unlocks heaven's door. So let's all Christians join together and pray for the Lord to fix all that needs fixing and tear up all that needs tearing

Praise God, He's able to do just that with enough faith on our part. I can be done. Please pray for us at Ever

GROAKER

EXTENSION SCENE North Carolina AGRICULTURAL EXTENSION

JOHN G. RICHARDSON son County Extension Chairman

Observation of problems is an everyday occurrence for Extension agents. While some problems are anticipated or even predictable, there are others that creep in as surprises and wind up being extremely difficult to explain or to determine their cause, initially. The heavy rains during the winter and spring have contributed to some problems that have bordered on the extraordinary, or are extremely interesting to say the least.

Some of the first problems that arose this growing season in plants were found in cabbage. When Jeff Morton examined the fields of cabbage, he saw symptoms such as slow growth, yellowing, purpling, and extreme cupping of the cabbage leaves. At first it looked as if we were faced with herbicide residue problems because of all of the oddball symptoms. However, due to the number of farms that reported problems of this type, it was hard to believe that herbicide residues could be creating a problem in so many different locations. By utilizing the numerous diagnostic services that we have readily available for anyone who may wish to avail themselves of such services, plant tissue analyses and soil tests were taken of several fields. The analyses showed us that the nutrient status in those fields was confused at best. However, one general trend stood out. The soil pH usually ranged from 4.4 to 5.0.

In addition to the cabbage problems, Everett Davis and other agricultural agents have observed strange deficiency symptoms in corn fields. Recently, in the Pembroke area, Jim Oxendine and Bill Carmichael of Robeson Farm Services accompanied me to a field that appeared to have something that I called "poor land syndrome." That was reactions that are constantly just a simple way of making a supposition that the soil was liming will be required next lacking in many nutrients. fall to correct the pH prob-

since the corn that was growing in the fields looked stunted and exhibited a broad range of deficiency symptoms. However, upon taking a problem soil analysis, we were surprised to learn that every single nutrient that is needed for outstanding corn production was present in the soil. But, a low soil PH was also found.

Another problem corn sample in the Parkton area turned out practically the same. Whereby, extreme phosphorus deficiency symptoms were clearly evident in the corn leaves. However, upon taking a problem sample soil test, we learned that the phosphorus level was quite high.

Naturally, as problems like these are observed and a good amount of analysis data is accumulated, one seeks a common thread which may apply to all of these deficiency problems. That common thread this year has been a characteristic low soil pH. From our vantage point it appears that a vast number of ... fields may have had a

somewhat marginal pH level last year and the extensive rains during the past few months have had a major effect on the soil by decreasing the pH levels.

In addition to the lower pH levels, it also appears that considerable amounts of sulphur have been lost from the soils. Therefore, we are also seeing sulphus deficiencies. Since there is little that one

can do in the growing fields to correct these problems, we believe that much of the corn that is showing deficiency symptoms at the present time will rebound as the weather becomes warmer. Nutrients that are present in the soil become more readily available due to the increased heat, which acts as a catalyst to speed up the chemical underway in soils. Naturally,

However, for high value crops and home gardens, which are experiencing similar problems, products such as gypsum (which is calcium sulfate), ammonium sulfate, or magnesium sulfate may be used to help alleviate some of the deficiency problems that currently exists. All of these products are readily available at farm supply stores, and in the event that magnesium sulfate is not recognized, Epsom salts is the common name that is usually used for this compound. A considerable amount of Epsom salts has already been utlized on

lems on a permanent basis.

were occurring in March. So, if problems exist on your farm or garden, a call to the extension Office is advised.

# JIM HUNT **Shouldn't Play POLITICS** With Our **SCHOOLS**

**Disruption In The Schools** 

## North Carolina School Boards Association:

Hunt's Union Dues Bill is "extremely dangerous," "would damage public education" and "do considerable harm." The NEA (Union) supports teacher strikes.1

## The Charlotte Observer Reported:

"In Hunt's view, education and politics have always been intertwined."2

No Wonder The Teachers Said:

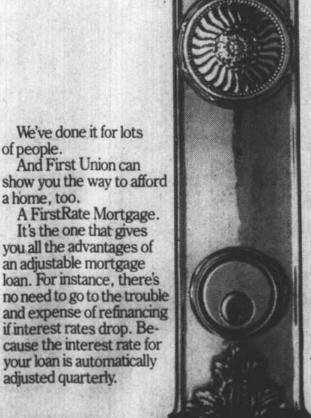

"The Governor's program does more for Hunt's political image than for education."

And, all this at a time when our public schools are in trouble!

Help Our Children: Contact Your Legislator To Defeat Jim Hunt's Teacher Union Bill.
