**Soccer-The Fun of Learning a New Game**

Here is a game played world-wide and yet many American kids have never played it. Europe is dotted with smaller soccer fields just as our country is dotted with Little League baseball fields. The simplest way to learn the fundamentals of soccer with school kids is to form a circle with the teacher in the middle. He can toss the ball to each player and have them "head" the ball on the hair line back to him. Then practice chest trapping, passing, instep kicking, dribbling, passing two on one, etc. It is a great game requiring little equipment and it is not a body contact sport with very few injuries. Games can be played by having four forwards, three half-backs and three fullbacks and a goalie. Make-shift goals can be set-up with chairs until regulation goals can be installed. Kids just love this game and should be given the opportunity to play it as has been done in many places in Robeson County.
