A WINS GOLD FOR GOOD GOVERNMENT

This information is provided by The Public Employees Roundtable, a group concerned with the quality of government service, with the support of the Blue Cross and Blue Shield Federal Employee Program. For information: PER, P.O. Box 7610, Wash., D.C. 20044.

The United States would be the sure runaway winner of the gold medal, if there were Olympic prizes awarded for governmental efficiency and effectiveness.

When stacked up against foreign competition, the USA shows up as a world class competitor in terms of low cost delivery of quality services. The team that makes this happen is made up of public employees. Did you know that?

• Americans have one of the lowest tax rates in the world.

• Among industrialized nations, only Japan spends a smaller portion of its gross domestic product on government — and Japan relies on us for its national defense.

• The USA and West Germany are more efficient at cutting red tape — as measured by fewer civil servants per capita in administrative functions — than any industrialized nation on earth.

• In more than 80% of the non-communist world, Government wages comprise a larger share of the economy than in the USA.

• The nations with the fewest public sector employees in relation to the economy are Canada, the Netherlands, Japan and the USA.

The true leadership of America shows up in the quality of its government. From exploration in space to disease control to developments in farming, America's public employees are sought out by governments and business around the globe for advice and counsel.

America's quest for excellence is not only a factor on the playing fields or gym floors, but is the single goal of public employees.

"Tis not a lip, or eye, we beauty call, but the joint force and full result of all."
Alexander Pope
