

HINTS FOR HOMEOWNERS

Save Water And Money

The current drought has made water conservation a top priority. So, even a slow drip in your toilet can mean a lot of water down the drain.

Consider this: A single leaky toilet can waste as much as 78,000 gallons of water a year without being noticed!

Such malfunctions are almost always due to worn-out parts. A leading manufacturer of toilet tank repair parts, Fluidmaster, is now offering the public a free leak detector packet as an easy way to detect a problem with a leaky toilet. The packet is available either at checkout counters or the plumbing department at most home center and hardware outlets.

The procedure is simple. Remove the tank lid and flush the toilet. As it refills, drop the harmless colored tablet from the packet into the tank. Wait five to ten minutes, then check the toilet bowl. If any trace of coloring appears, the toilet tank is leaking and should be repaired.

One of the handiest and least expensive methods to stop toilet tank leaks permanently is with Fluidmaster's do-it-yourself repair valves and flusher kits. They're packaged with complete instructions and are easily installed.

Happily, a drop in the bucket can now prevent you from wasting an ocean of water.

office of the Register of Deeds of Robeson County. Subject to however, any Right of way now owned by The Town of Pembroke, N.C. on that 10 inch Sanitary Sewer Main across the Northern side of the above tract. Bearings of the above tract are referenced to Deed Book 570 at Page 192.

The time and place for the public hearing concerning the action will be held at 7:00 p.m. o'clock on the 1st day of May, 1989 at the Pembroke Town Hall, at which time interested parties will be given an opportunity to be heard concerning this matter. This the 18th day of April, 1989.
