**FISHIN' TIPS FROM THE TRACKER PROS**

*Johnny King*

Filet knives—every serious fisherman owns one, or two, or ten.

They come in assorted sizes, lengths and degrees of quality. The secret of a good filet knife is how sharp it is kept.

Any good, sharp filet knife will work when there are a few fish to clean. But what about those rare days when a lot of fish are there for cleaning?

The best solution to this problem is an electric filet knife. It's easier to operate than a conventional knife, and does the job in half the time, and when mastered, actually does a better job than a manual filet knife.

Several electric knives are designed especially for filleting fish. They can be purchased for under \$25.00 and make excellent gifts for that favorite fisherman. Remember to keep only those fish you intend to eat.

*Fishin' Tips are presented by America's #1 fishin' boat.*
