

**ONE ASPIRIN SAFER THAN OTHERS  
IN TREATMENT OF ARTHRITIS**

A study published in the New England Journal of Medicine shows that a form of aspirin known as enteric-coated or safety-coated aspirin is safer on the stomach than plain or buffered aspirin. For millions of Americans who suffer from arthritis, this is welcome news.

Plain aspirin is effective arthritis medicine, but it can irritate the lining of the stomach. And buffered aspirin can have the same effect.

But safety-coated aspirin, even taken at the maximum daily dosage of 3900mg., is proven to be safer to the stomach. That's because it has been designed to dissolve after passing through the stomach. As a result, safety-coated aspirin relieves the inflammation that causes pain, swelling and stiffness, but with less stomach irritation.

This is good news for people who had given up aspirin for an aspirin substitute, like Tylenol, which is not as effective in treating arthritis. Tylenol works on pain, but it does nothing to relieve inflammation.

The brand of safety-coated aspirin most often recommended by arthritis specialists concerned about aspirin irritation is called Ecotrin. And it's the only national brand that comes in maximum strength doses. For more information, ask your doctor about safety-coated Ecotrin.

**For Stomach-Safe  
Arthritis  
Pain  
Relief.**

For relief of pain and inflammation, arthritis specialists concerned about aspirin irritation recommend Ecotrin over plain or buffered aspirin. That's because Ecotrin is safety-coated. Even when you're taking the maximum dosage, Ecotrin is safer to your stomach. **ECOTRIN, THE STOMACH-SAFE ASPIRIN.**

**CHURCH NEWS**

The South Broadway Baptist Church located at 211 South Broadway, Baltimore, Maryland announces its fall revival to begin Sunday, October 21, 1990.

According to the church pastor, Rev. Jimmy Lynn Hunt, services will be conducted each evening through out the week beginning at 7:30 p.m. Sunday evening services begin at 7 p.m.

It is reported that Rev. Michael Cummings, Director of Missions for the burnt Swamp Baptist Association, will be the visiting Evangelist for the week.

Special singing groups have been invited to come and be a worshipping part of the services.

Rev. Hunt has shared that the need for an old fashioned revival in Southeast Baltimore is very obvious. He says that "there is such high incidence of activities which are contrary to what the church knows to be a more perfect way."

Rev. Hunt emphasized how every one is not only welcomed, but are also encouraged to attend this week's service.

**FACTS  
& FIGURES**

Here's a surprising fact: despite its name, a heat pump provides summer cooling as well as winter heating. Another fact that may warm up your interest even more—on electric heating bills, heat pumps can mean savings of 30 to 60 percent because they use 30 to 60 percent less energy to supply the same heat as an electric furnace.

In 1987, American homes and businesses purchased a record number of heat pumps—900,000. This was 3.9 percent more than in 1986.

**Just Remember**

by Annie Lois Freeman

Just remember when you are alone, and no one seems to care. Remember Jesus is there with you. He is always near when your body is racked in pain and no one seems to care. Jesus is always near, just as close as a humble prayer when we call on Him and sometimes it feels like He's far away...Just wait and have patience, He will always be there, he will dry that tear, He will ease the pain, for He is always there.

**Benefit Sing  
Planned**

There will be a benefit sing for Ms. Annie Lois Freeman on Friday night, October 12 at 7 p.m. at Oak Grove Holiness Church. Rev. Grover Oxendine is pastor.

The singers are The Kelleys, the Tylers, The Hunts and the Chavis Sisters.

**Now Kidney Stones  
Are In For A Shock**

**SHOCK WAVE LITHOTRIPSY**

Southeastern General Hospital is proud to announce the most advanced medical treatment available for the removal of kidney stones — Extracorporeal Shock Wave Lithotripsy or ESWL.

This new, non-surgical treatment rids patients of stones in the kidney and ureter by using focused shock waves to pulverize the stones. While earlier lithotripsy treatments required patients to be anesthetized and lowered into a water bath to break up the kidney stones, patients may now be medicated by a sedative given intravenously then lie on a table as the lithotripter breaks up the stones — And the whole procedure takes less than two hours.

The success rate of lithotripsy is high. In fact, eighty to ninety percent of people previously requiring kidney surgery won't need it. And because the procedure is non-invasive, the pain and discomfort which follows surgery is avoided. The procedure is done in an outpatient setting and most patients can return to work or normal activities within twenty four hours. Patients are then checked at regular intervals to follow the progress of stone fragment passage. If need be, lithotripsy can be safely repeated.

So if you should suffer from kidney stone discomfort, consult the professionals at Southeastern General Hospital... where, thanks to Extracorporeal Shock Wave Lithotripsy, kidney stones are now in for a shock.
