

For Over 40 Years
 Southeastern General Hospital
 Has Pursued A Growing
 Commitment To Excellence
 In Healthcare Services...

Now Our Name Reflects It.

SOUTHEASTERN REGIONAL MEDICAL CENTER

Keeping in step with today's constantly changing medical technology is essential to providing complete healthcare.

For over 40 years, Southeastern General Hospital has pursued this objective for the citizens of our regional community. In the process, we've grown beyond what simply could be described as a hospital. We felt that this was a very appropriate time to adopt a name and logo that reflect a more accurate picture of all the services we've come to encompass in all the primary areas of healthcare...Prevention, Treatment and Recovery.

Our continuous upgrades have brought in such state-of-the-art diagnosis and treatment technologies as CAT Scan, MRI and Cardiac Catheterization. Our New Life Birthing Suites took labor and delivery to a whole new level. And outpatient surgery, laparoscopic surgery and laser surgery made dramatic changes in the recovery periods and cost of surgical procedures. But it is our expansion into areas beyond our hospital itself that enables us to function as a true Medical Center to the Southeastern region of North Carolina.

Health Horizons Home Health Agency recognizes the dignity of all patients and their need for normalcy and independence by sending a team of healthcare professionals, along with necessary equipment and supplies, into the patient's home. They work with the patient's family to maximize his or her health potential.

Carolina Manor is our substance abuse treatment center.

Located in a secluded campus setting, this center provides a retreat-like atmosphere with skilled counselors and support staff dedicated to helping patients return to productive, substance-free lives.

Concern for the increasing and very specialized needs of the patients and families affected by Alzheimer's and related disorders, prompted the development of WoodHaven Alzheimer's and Nursing Care Center.

Our nine private and three double occupancy rooms and wooded setting provides a home-like environment with specialized staff and treatment.

With the increasing awareness of the importance of prevention, our Lifestyle Fitness Center was a logical development, and one very well received by our community. The facility is located two miles from the hospital, features aerobics, indoor pool, high-tech equipment and racquetball courts.

Health Horizons Uniforms and Medical Equipment gives medical staff and patients convenient access to specialized equipment, supplies and clothing mandated by professional and patient treatment.

Hospice of Robeson provides physical and emotional support to terminally ill patients at a time when they need it most. Alleviating the taxing, emotional demands of primary care gives through skilled, compassionate nurses, aides and counselors.

All of the services of Southeastern Regional Medical Center are guided and enhanced

by the Southeastern Regional Medical Center Foundation. This organization enlists the support of the community and encourages contributions to enhance the quality of healthcare for the citizens of our region.
