SMALL CROWD WAS OUT BATTLING NELSON NOT DESIRABLE HOTEL GUEST

Rochester Won Free Hitting and Poor Fielding Game.

Rochester's Eastern League champions and Greenboro's Carolina League champions met at the Park yesterday afternoon and after the practice was over, Greenboro and one factor, while Rochester got away with the victory 14, which however didn't represent anything other than luck yesterday.

The game today should have been Greenboro's after the first inning in the initial inning, when the local manager runs on good clean hitting, the score at the end of that round being Greenboro 4, Rochester 1.

The game was characterized by free hitting and some beautiful catches, but neither side showed any great amount of baseball ability, the hitting being spotty. There was plenty of hitting, plenty base-running and plenty of error-laden work, which might be but never was, and in all these the game was interesting and worth seeing, but to the fan there was nothing in it.

TRINITY BALL TEAM ON THEIR SOUTHERN TRIP

(Special to Daily News.)

Durham, April 7.—The Trinity college baseball team left here this morning to be gone for ten days on the annual southern trip. From here they went to Clemson college, S. C., where they play two games, and then go to Spartanburg, where they try their hand at the league. Their next stop will then be Athens, Ga., where they play the University of Georgia two games and then to Macon, Ga., where they have two games with Mercer, and return to Durham in time to play Wake Forest on the following Monday.

Coach M. T. Atkins accompanied the boys, and will be with them on the entire trip. Last year he was not able to go with them on account of having to go to Baltimore and take up his work with the Orioles before the team would return.

Those who made the trip are: Clyde S. Crawford, manager; Walter B. West, captain, first base; Claude Flowers, catcher; Claude West, short stop; Sam Gunn, pitcher; Godfrey, pitcher; Houston, third base; Edgar Bundy, pitcher and second base; F. C. Cooper, center field; Grandy, left field; Foushee, right field; Thompson, sub infield; Henderson, utility man; Spruce, sub-catcher.

AMERICAN ADVENTURE TALES

How the Books of Fenimore Cooper and Mayne Reid Stand in Our Literature.

From Hildgarde Hawthorne's "Books and Reading" in St. Nicholas. Many of the books written by Fenimore Cooper and Mayne Reid are concerned with the life of the red man, and of the peaceable who came into direct contact with him. The Leather Stocking Tales are among the most enchanting a boy or girl can read. Their hero, Natty Bumppo, is a man as gentle, simple, brave and modest as was ever put into the pages of a book.

Whether spring be late or far advanced, the camerist has been enticed into the open. He is making pictures of the new born season or taking mental notes of those to be made later. Visible aid to enable him to produce the best possible results, technically and artistically, is supplied by the April issue of Photo-Era, the popular photographic journal par excellence. This number sustains the reputation of this excellent publication. The front cover is adorned with an Easter picture of uncommon beauty and significance—a young mother cradling her beautiful child. It is typical of the Easter lily in beauty and purity. For the camerist with artistic taste is a valuable article on "Planes Landscape-Photography," by Walter Zimmerman, and for the portraitist, "Indoor Portraiture in Dull Weather," by J. Peat Miller. Technical articles by equally well-known authorities are "Time Development," by Gaston R. Alves, "A Modified Kodak," by Wilfred H. Schoff, and "Supplementary Positives," by G. H. Bethell.

The Round Robin Guild department, devoted to all the needs of the beginner, contains a second paper on gum-bromide printing, a beautiful process capable of exquisite results in the hands of a person to taste and skill. The crucial department contains a number of new and timely technical suggestions. The illustrations are conspicuously beautiful—eminently so. "Away to the West," an impressive and broadly handled marine, by Arthur Marshall. The rest are attractive landscapes and genre studies by eminent American and European workers. Typographically the April number is up to its well known high standard. A specimen copy will be mailed free to anyone interested by the publisher, Wilfred A. French, Boston, Mass.

CURTIS BROKE A RECORD IN AERIAL NAVIGATION

(By The Associated Press.)

Memphis, Tenn., April 7.—Aeroplanes sweeping in graceful curves and darting birdlike the length of the tristate fair grounds gave to thousands of spectators today their first real knowledge of aviation. Spectacular flights and the breaking of a world's record by Glenn H. Curtiss, the "bird man," of Hammondsport, N. Y., were the features of the second day of Memphis' first aviation meet. Weather conditions were perfect and the aviators having become accustomed to the course, flew their aeroplanes today with skill and precision, at the same time giving promise of more sensational events tomorrow.

Curtiss' quick start record of 6 2/5 seconds, made by him at the Los Angeles meet, was broken by him with ease this afternoon. He rose from the ground in 5 4/5 seconds, but in the same test failed to break his start record of 98 feet. After breaking the record the aviator took his wife up on her first flight.

Charles F. Willard attempted to lower his accuracy record, but was forced to alight without completing the prescribed course, owing to engine trouble. He will make another attempt tomorrow.

J. C. Mars, one of Curtiss' latest pupils, made his first flight in public today, receiving an ovation from the manner in which he handled the four-cylinder biplane.

K. I. Bernard, manager for Curtiss, said this afternoon that the Memphis course was too small for the aviators to attempt to lower and speed records, but they felt confident of lowering other records in which speed is not an essential.

Photo-Era For April.

Whether spring be late or far advanced, the camerist has been enticed into the open. He is making pictures of the new born season or taking mental notes of those to be made later. Visible aid to enable him to produce the best possible results, technically and artistically, is supplied by the April issue of Photo-Era, the popular photographic journal par excellence. Technical articles by equally well-known authorities are "Time Development," by Gaston R. Alves, "A Modified Kodak," by Wilfred H. Schoff, and "Supplementary Positives," by G. H. Bethell.

Nature's Gift from the Sunny South

Cottolene Is a Food Product of Absolute Purity

In recent years there has been a wave of reform in the making and inspection of food products. National and State Pure Food Laws have been passed, regulating their manufacture, to insure the customer getting pure, healthful food.

Any product which contains hog fat is subject to the taint or possibility of disease germs. Lard is made from hog-fat—it may be pure, and it may not. At any rate, it is at best indigestible, and will raise havoc with any but the hardest stomach.

Cottolene is a vegetable product, which is far superior to lard for all shortening and frying purposes. After the cotton seed oil has been refined through purifying processes of our own, it is made neutral and odorless, and an absolutely pure and healthful fat is the result.

Cottolene is a product of nature and is bound to be wholesome. It is the one dependable, healthful product for frying and shortening, and is carefully inspected and made to conform with all pure food laws.

COTTOLENE is Guaranteed Your grocer is hereby authorized to refund your money in case you are not pleased, after having given Cottolene a fair test.

Never Sold in Bulk Cottolene is packed in pails with an air-tight top to keep it clean, fresh and wholesome, and prevent it from catching dust and absorbing disagreeable odors, such as fish, oil, etc.

The EDISON Phonograph would still be the greatest sound-reproducing instrument without the Amberola. The Amberola would still be the final and greatest expression of the Edison Phonograph without Amberol Records.

Spring is at hand, and with the spring the old, roving, eye-strain wakes up and drives us slowly by its wild mission as the Pied Piper is supposed to have bewitched all the little children into following him when he played on his pipes. We long for the boundless west, but we have to be content with such fields and woods as are at hand. But, fortunately, there is nothing to stop our imagination from taking part in all the great adventures of pioneer days, and though there are some disadvantages in this method, it is yet the best that remains to most of us, and it cannot be denied that it also has its advantages, such, for example, as the surety of having supper when we get home, and of keeping our souls on our heads, matters not always to be expected in those days we love to read about.

S. S. S. RHEUMATISM

The cause of Rheumatism is an excess of uric acid in the blood. The uric impurity gets into the circulation by absorption, usually because of constipation, weak kidneys, and other systemic irregularities. Then the blood becomes weak and sour and irritating urate particles are formed in this vital fluid. When in this impure condition the blood can not furnish the necessary amount of nourishment to the different muscles, tendons, nerves and ligaments of the body. Instead it constantly steepens them in the briny acid matter, and the gritty, urate particles collect in the joints, which causes the pains, aches and stiffness of Rheumatism. Liniments, plasters, etc. may relieve the acute pain of an attack of Rheumatism, but such treatment does not reach the blood and therefore can have no permanent good effect. There is but one way to cure Rheumatism and that is to purify the blood of the acid poison. S. S. S. goes into the circulation and attacks the disease at its head. It removes the cause for the reason that it is the greatest of all blood purifiers. It filters out every trace of the sour, inflammatory matter, cools the acid heated circulation, adds richness and nourishment to the blood and permanently cures Rheumatism. S. S. S. does not patch up, it cures permanently. S. S. S. is especially valuable as a remedy for Rheumatism because it does not contain a particle of harmful mineral in any form. It is purely vegetable, a fine tonic as well as blood purifier. Book on Rheumatism sent free to all who write. THE SWIFT SPECIFIC CO., ATLANTA, GA.

20 Years Sick Well Again CARDUI, we would not be so insistent. But letters come to us every day, from all over the country, telling of the lasting benefit obtained from CARDUI. This great medicine is over 50 years old, and is more in demand to-day than ever. CARDUI has stood the test—it has become the standard, reliable medicine for women of every age. CARDUI is prepared from purely vegetable ingredients and contains not a single harmful drug. Try CARDUI today. It can't harm you—its record shows it is almost certain to help you. Try CARDUI and get well. For sale at all druggists. Take CARDUI
