# TALK OF DISARMAMENT MAKES STOCKS DECLINE

No Matter What the Benefits, Dislocation In Various Industries Is Feared.

PROFIT GRABBERS BUSY

(by Lessed Wire to Delity Reva.)

Comprish, 1933, by Functional Public Ledux.)

New York, Nov. 14.—Undoubtedly the action of today's stock market came as a disagreeable surprise to many who had hoped to see the favorable impression created by the Hughes disarrament proposals reflected in the rising prices for securities. The explanation for reactionary tendency would embrace several features none of which would be conclusive in Itself.

One was the feeling that the market had advanced to a point where profit taking was in order and that encouraging news of the character mentioned furnished a strong reason for selling. Another was the belief that no matter how beneficial might be the ultimate effects of the program suggested, a certain amount of dislocation in various industries and companies would be entailed.

Consequently when selling made its sphearance at the opening on Bethlehem, Cruchbie and on other steel shares, even the most bullish operators became uncertain of their position. The sharp rise in Mexican Fottrelsum and other members of the oil group and the strength exhibited by the leathers and coppers, merely delayed the attempt to take down profits. Toward the close the selling gained in volume and the undertone became more unsteady.

Weakness of a special character was alignized by a few specialities, such as Industrial Alcohol, Wilson and company and the rubber and tire shares. In the latter case, this was due to the announcement of further price reductions.

that has falled to participate in the price cutting regime is Goodrich, which is expected to fall in line in the near future.

C. B. EVANS' CHICAGO LETTER.

(By leased Wire to Paily News.)

General. 1921, by Phiadelphs Public Ledger.)

Chicago, Nov. 14.—Along with the foy over the promise of less war in the world comes a grief, decently suppressed, at the menace of lower prices for commodities, making its mark now principally in a decline in stocks.

Larse Chicago interests participated in the decline. National Leather stock, which sold on Saturday at 5% on a par of 10, went to 2% today, a tumble of 40 per cent or more. This is an expression of liquidation going on in western interests rather than any effect of the proceedings of the conference, liquidation which is merely a part of that which has been in progressa for a year or more. It is an old story, the telling of which goes on and will go on for a period which it is not easy to estimate. It is a justification of the warnings that have been uttered by Chicago bankers and others in the face of a security market which has shown a strong tendency to move up.

Leather has been a peculiarly undependable commodity, and its performances are closely related to the unfortunate conditions of the farm interests.

The stock of the National Leather company has sold this year as high as 3% and up to 18% last year, but dividends of 80 cents a share previously paid were discontinued February 15, 1921. A deficit thus far this year of over \$21,000.000 looks pretty big as against \$26,686,408 aggregate assets, but the proposed \$12,000.000 will make that stock worth at least \$12, hence large purchases outside of the Swift interests, controlling the property. These gold notes of the company went of moderately on the issuance of the proposition to issue preferred stock market comes at a time when the trade in bonds is quite as great as ever. The advance demand for the lessue of New York Telephone company has been such that the allotinent to buyers will be small. Already there ar

NET GAIN AT NEW ORLEANS

New Orleans. Nov. 14.—The trend was strongly higher in the early part of the session in cotton here today but the late trading brought new selling of consequence which pared the gains of down materially. At the highest of the day prices were 12 to 55 points over the close of last week, while last prices were at net gains of 38 to 41 points. The main buying feature of the session unquestionably was the builtsh construction placed on the opening event of the conference to limit armament and for a while this construction outweighed anything and everything else that could be brought forward. Liverpool was much better than due and it helped to open the market at a higher level. Another builtish factor was the report that a private cropporting bureau had come out the stop commenced to feel of the market at a higher level.
