AND TENDENCY HIGHER

The Investment Buying Takes On the Character of Semi-Speculative Buying.

GOOD DEMAND FOR RAILS

(By Leard Wire to Daily News.)

(Oppyright, 1971, by Philadelphia Public Ledger.)

New York, Nov. 28.—Tradling in stockes today again covered a broad range, with the general tendency higher and the character of the market quite similar to that of the clossing days of hest week. In other words, the investment buying that has been such a feature of recent sensions again took on the character of semi-speculation, although the demand seemed to be concentrated largely on dividend daying stocks or issues with excellent prospects, both in respect to carnings and dividend disbursements. Buying was particularly active in the rails, equipments and coppers, although the gains in the latter group were not unformely held. Utah Copper, for example, got up to 60, the highest price in a good many months but reacted moderately later. American Car and Foundry was strong onceintively heavy trading. Baldwin made a further advance and Pullman and Prossed Steel Car were higher. In the rails. Union Facific was an outstanding feature, with an advance to lai, a new high level, Atchison, Northern Facific, Southern Pacific and higher. On the other hand, New Haven made a new level to rail time on gloomy forecasts of its financial future. In spite of the rather indifferent reports regarding the status of the steel industry, the steel shares were steady to firm, with the exception of full States and Crucible who he were alightly reactionary. United States the Charles of the rather indifferent reports regarding the status of the steel closed at the cop on buying of fair volume.

steel industry, the since shares were steady to firm since industry. United States Steel closed at the cop on buying of fair volume.

**MONITORYN WALL STREET GOSHP (Res.) (Cognitist, 1921, by Fullsohiphia Public Ledgar). New York, Nov. 28.—Trailes and rall-way equipments continued to lead the urther irregular price movement on slightly higher opening and a sauging market through the remainder of the season. The higher opening arrived as per schedule, and there enauged the season. The higher opening arrived as per schedule, and there enauged the season. The higher opening arrived as per schedule, and there enauged the season. The higher opening arrived as per schedule, and there enauged the equipments. United States Steel and some of the railroads were placed with the equipments. United States Steel and some of the railroads were placed with the result that a generally higher range of prices was established.

There have been reports that directions of the D. L. and W. sailroad dependence of more with the company's affairs it is learned that the dishursement will be larger than \$2, but that the exact amount has not the highest this stock recently has been of an excellent character.

Sears-Rochust was an outstanding Sears-Rochust was an outstanding but this was denied officially.

A decine of more than a points was attributed to a report that search and the dividend in preferred stock will be passed when the directors meet this week. It was reported also that the company contemplates new financing but this was denied officially. It is in a favorable investment position compared with the company contemplates new financing the passed when the directors meet the points was an outstanding the passed when the directors meet the points was an outstanding the passed when the directors meet the points was called the points with the preferred stock will be passed when the directors meet the points was called the points of the large will be passed when the directors meet the points was a point of the points of the points of

cipal purchasers of this stock recently.

C. B. EVANS CHICAGO LETTER.

(By Leand We to Daby Sees.)

Copyright, 1911, by Philadelphia Phille Ledger.)

Chicago, Nov. 28.—They tell it in chalk on the blackboard and in ink on the tape, this story of expectation, and expectation is the chief quality of the business revival at the present time, though by no means all there is to it Wheat, too, is making its little scratch on the record at advancing prices, and this is the most hopeful augury of all, this city Puliman continues to be a favorite evan after the big advance from the recent low of \$7\$. This is due in part to a valuation of its properties which appears to be low companyed with that of others, and also to probably improved relations with the relicands, but in the main, of course, to the seemingly excellent bargain that is now in process of being made, with the Haskell-Barker Car company. The rise in the price of this stock is a great relief to many small holders and bandownely enriches a number of big unes well known as identified with the company.

Nearly all the other local specialties

somely enriches a number of big ones well known as identified with the company.

Nearly all the other local specialties are moving upward, some having scored large advances from the low of this year, but Sears-Roebuck is decidedly off the pitch today, 4½ noints, and that company probably represents the general business. situation of the linked States as well as any that could be named, insamuch as it touches trade in a retail way at more points than others.

But a little later on the pen, which in recenit experience has not been so mighty as the sword, will tell it in reold, uncompromising into on the ledger—no, not all cold, for there will be pienty of red. There is contradiction in the minds of mean hopeful of husiness affairs in respect to the course of events in the next three months. Money is constantly cheapening, and we shall have a flood of it in the market affer the first of January, says one. That will naturally lead to purchases of securities, causing a further advance. But, says the same one, we shall have a grand actiling up process in the first few weeks of next year, and of course there will be many failures. This is not the guess of an outsider. But the statement of one who knows the inside of these two conditions is a highly interesting study. It might prove too interesting to anybody trading the stocks on a small margin. But the stocks market faces determined prove too interesting to anybody trading in stocks on a small margin. But the stock market faces determinedly toward better things and the stock market in the past two years has shown that it knew what it was taking about, for it began its great downward movement when the people were climbing over each other to buy goods at bloated prices.

COTTON CLOSES AT GAIN PRICE OF WHEAT HIGHER

Early Liquidation Causes a Bad Slump But Rally Puts General Market 3 to 25 Points Higher at End of Day's Trading.

But Raily Purs General Market 3 to 25 Points Higher at End of Day's Trading.

New York, Nov. 28.—A renewal of liquidation caused further sharp declines in the cotton market during today's early trading. January contracts selling off to 17.11, or 48 points net lower and 139 points below the high level of hat week. Offerings then became smaller and a covering movement developed which sent January up to 17.70 in the late trading, or 59 points above the sarly low and 13 points net higher. That delivery clossed at 17.65 with the general market closing firm at a net advance of 3 to 25 points, with the general market closing firm at a net advance of 3 to 25 points. The market opened casy at a decline of 17 to 39 points, owing to the continued weakness of Liverpoot, reports of unfavorable trade conditions in Manchester and complaints of a continued poor demand with a decilining tendency in the domestic goods market. Private cables reported increased hedge selling in Liverpoot. Similar reports were received from New Orleans, and there was also some hedge selling here, accompanied by rumors that spot cotton could be purchased in some eastern belt sections on a tenderable basis. This gromoted local selling as well as scattered commission house liquidation, as a result of which December eased off to 17.28 and March to 17.03 during the middle of the morning.

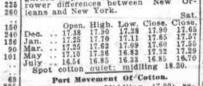

The market then showed the influence of a firmer technical position as there was a distinct subsidence of a firmer technical position as there was a distinct subsidence of a firmer technical position as there was a distinct subsidence of a firmer technical position as there was a distinct subsidence of a firmer technical position as there was a distinct subsidence of a firmer technical position as there was also bullish comment on the situation as to pink boll worm in

that trade and other interests had absorbed many contracts on the early decime.

There was also bullish comment on the situation as to pink boil worm in Texas, and probably some buying on roports of a better tone in the stock market and foreign exchange rates. The latter was attributed partly to reports that the reparations commission had called a conference of European bankers to discuss the stabilization of exchange rates. December railied to 17.90 and March to 17.62 and the close was within a few points of the best.

Reports that the state of Louisiana had issued quarantine regulations against cotton from New Mexico, Texas, Oklahoma and Arkansas because of the pink boil worm were regarded as probably foreshadowing narrower differences between New Orleans and New York.

Australia's Smaller Surplus and Low Condition Of Kanana Crop Cause Bise—Close 2½ To 2½ Cents Up. Corn and Outs Ave Off.

Corn and Ont- Are Off.

Chicago, Nov. 28.—Heavy falling off in the estimated exportable surplus of Australia, together with a record-breaking low condition of the winter-crop in Kansas did a good deal today to lift the value of wheat. Prices closed unsettled, but 2% to 2% cents net higher, with December 1.14% to 1.14% and May 1.17% to 1.17%. Corn finished unchanged to % cent up; cate unchanged at 5 cents higher.

PINK BOLL WORM CAUSES AN ADVANCE IN PRICE OF COTTO

PINK BOLL WORM CAUSES AN
ADVANCE IN PRICE OF COTTON
New Orleans, Nov. 28.—The pink boil
worm was the big factor in the trading in cotton today and it brought the
market out of the fairly wide decline
to moderate net advances, the rise from
the lowest of the session amounting
to 71 points on January, which sold as
low as 16.40 and as high as 17.11,
finally closing at 17.02. At the highest of the day the trading months were
5 to 27 points over the last quotations
of Saturday; the close was at net gains
of 5 to 25 points.

The early part of the day was featured by heavy pressure against the
market which was on the opening, encouraged by a much lower Liverpool
than due. Much liquidation came from
the long side and as the price fell stop
loss orders were caught. At first no
great amount of attention was paid
to the pink boil worm situation and
when the market got 41 to 45 under
the close of Saturday it was the realizing by shorts that checked the decline, rather than any other factor.

Baton Rouge wired the cotton exchange that the state of Louislana had
quarantined against New Mexico, Texas, Oklahoma and Arkansas because of
the pink boil worm. While it was
stated that this would not interfere
with the export movement of cotton
through New Orleans from the quarantlined area it was generally accepted
that it would prevent cotton from that
area from going on contract. This
helped the price to some extent but
buying gradually increased on the fear
that the worm would restrict acreage
this coming season and from now on
might be a fresh influence of importance working against the production
of cotton.
