Lessened Volume of Business Gives Market a Somewhat Reactionary Appearance.

COPPER STOCKS FIRMER

inances and her economic and industrial position.

(B) Leawd Wre to Day Seal.)

(B) Leawd Wre to Day Seal.)

(Copright, 121, by Hindshims Public Ledger.)

New York, Nov. 22—1t was learned before the opening today that measures had been considered to provide the New Haven with the funds necessary to take care of its bond issue of 115,000,000 francs, placed in France and which mature shortly. In addition to the banking assistance to be rendered, negotiations with connecting trunk lines are in progress which result in sufficient tonnage being diverted to the New Haven to provide revenues to carry the company through the present period of depression. Official announcement of these plans is expected within a few days. The buying today was for the account of banking interess.

csis.

Delaware, Lackawanna and Western had been bought on reports of an extra dividend to be declared before the end of the year. From a source familiar with the affairs of the company, it is learned that an increase in the dividend rate in addition to an extra dividend is in prospect.

rate in addition to an extra division is in prospect.

A recently organized pool in Tennessee Copper is making a more active market for this stock. Earnings are showing a substantial improvement and the statistical background necessary to interest the public exists. A large percentage of the company's earnings is derived from the chemical branch of its business, although the title leads to the understanding that it is a copper company.

Hefore the opening this morning

title leads to the understanding that it is a copper company.

Hefore the opening this morning word was circuinted that the stock of the Pure Oil company was to have a substantial advance. The tip made good, and this was taken as significant by traders because it is an oid adage in the Street that "buil tips make good in bull market. The move was due wholly to the operations of a speculative group.

C. H. EVANS: CHEAGO LETTER.

by traders because it is an oil adage in the Street that 'bull tips make good in bull market. The move was due wholly to the operations of a speculative group.

C. B. EVANN CHICAGO LETTER.

(By Lesse Wie to Bally New.)
(Capyright, 1921, by Philadelphia Pathle Ledge.)
(Chicago, Nov. 23.—The idea of canceling the debts of foreign governments to the United States—a matter of importance among Americans ebullient of world patriotism just after the war, of academic discussion since that time—has a much stronger hold on the initials of persons high up in the United States than is commonly supposed as appears from statements by responsible people in Chicago within the last lew days. This would appear if names could be mentioned. Of course government officials cannot talk on the subject except among themselves and in the most cautious way, but before long the matter will no doubt be brought up in Congress and probably under conditions calling for a vote.

It is reported that Lloyd George will propose that the German debt to Great Britain and France be canceled, but it is not quite safe to say just what that means. He may have a plan for setting to the United States an example of what he thinks ought to be done in the line of generosity.

Unquestionably many an American would feel greatly relieved if these debts were sponged off the world slate, for that would do more to simplify the international financial situation than anything else, but that same citizen would have to pay his share of the taxes on the full amount of our national debt, including the \$11,000,000,000,000 due us from Europe. He might solace himself with the reflection that the debt probably hever would be paid anyway, and that we should make a virtue of necessity.

It would be a long process to investicate all the bearings of cancellation on all classes of business and all kinds of poople, but one might refer to the most numerous part of our population, the farmers. They have been placed in an unpleasant position by the bad status of experts of their pro

of their thought. C. H. EVANS.

Early Declines, Then Sharp Railles, Followed By Breaks in Late Trading, General Market Closes at a New Loss Of 12 to 37 Points.

Early Declines. Then Sharp Rallies. Followed By Breaks in Late Trading. General Market Closes at a New Loss Of 12 to 37 Points.

New York, Nov. 29.—Early declines were followed by rather sharpe rallies in the cotton market today but prices broke again in the late trading and closed casy at a net decline of 12 to 37 points. January sold up from 17.48 to 17.95 and broke to 17.46, closing at that price compared with 17.65 at the close of the previous day.

The market opened steady at a decline of 2 points on May but generally unchanged to 13 points higher in response to relatively firm cables, but cased off right after the call under southern and scattering local selling. Reports of a continued dull demand, with a sagging price tendency in the goods market, contributed to the decline, while the circulation of December notices, representing about 2,500 bales, caused scattering near month liquidation.

There was also some selling on reports of an easier spot basis in the southwest and before the end of the morning December touched 17.63, or 37 points net lower, while later months showed net losses of 15 to 20 points with March selling at 17.40, Offerings were comparatively light, however, and the market turned firmer during the middle of the day on reports that plink boil worm were being found in other sections of Texas and talk of probable buillish ginning figures for the period ending tomorrow night. Wall Street was a good buyer on the rally which carried December notices seemed to be circulating during the greater part of the day in the later trading under Equidation by early buyers and New Orleans selling. March soid off to 17.38 and closed practically at the low of the day. December notices seemed to be circulating during the greater part of the day in the later trading under Equidation by early buyers and New Orleans selling. March soid off to 17.38 and closed practically at the low of the day. December notices seemed to be circulating during the greater part of the day. although it was rumored that part of th

CLOSES AT MODERATE LOSS

New Orleans, Nov. 29—A trading market prevailed in cotton tuday, with fairly broad price swings both above and helow the level of yesterday's close. In the late trading selling pressure increased and the close was at net losses on the session of 11 to 25 points. January closed at 16.84.

On the opening the tendency was to do better on favorable cables but after advances of 3 to 5 points there was a form the final prices of yesterday as the result of telegrams from flouston, stating that the spot basis there was easier. From this decline the market again was lifted to not advances by the rumor that a large spot concern was long of about 50,000,000 bales of December in the New York market upon which it would demand cotton, and by more favorable international political news, or what the trade construed as such. Soon after mid-session prices were 27 to 32 points up with January at 17.37.

In the afternoon the market softened under attempts, to realize on the report that notices for 3,000 bales to go on December contracts in New York still were circulating. New low levels were made by most months, the list showing net losses of 13 to 26 points. At this stage January traded down to 16.83.

Everybody's Business

Indeed it is! Your business and my business. And the efficiency of our eyes is a most serious business. Most of us, fully 70 per cent, have defective vision-unknowingly. Now one is secure in "thinking" that his eyes are 100 per cent efficient. It's safest and wisest to know! See an optical specialist. His diagnosis may be an "eye-opener." And a bread-winner, too, for good eyesight invariably means good health and keen mentality.
