Recent Liquidation Have Placed Market In An Excellent Trading Position With a Majority of the Issues Showing a Decided Upward Tendency.

(By Leand Wire to Daily Ness.)

(Copyright, 1922, by Fhiladelphia Fabric Ledger.)

New York, Nov. 2.—Today's stock marked witnessed a continuation of the forward movement which began in such promising fashion yesterday. Trading appears to have settled down to a fairly uniform pace of approximately a million shares daily, with a wide range of issues the subjects of transactions. Although there was evident today at various times and in various portions of the market the usual speculative disposition to look for the "secondary reaction." a development frequently noted after sharp recoveries, from severe stepressions, those who operated on this theory, made little headway. Gains were generously scattered throughout the list while num.

mirker witnessed a continuation of the forward movement which speak of the secondary movement with observed the forward movement with observed the forward movement with observed the forward movement with observed the secondary freedom of the forward movement with observed the secondary freedom of the forward forward freedom of the forward freedom Cork Province Cortes Silver Cresson Gold Brooklyn City R. on the Rock Island for the entire month of Outober totalled 143,448 cars as compared with 138,828 cars during September. However, October a year ago shewed a total of 149,516 cars.

S. S. Kress sales for the first three months or the year were 42,344,749. as compared with \$38,565,609 during the same period last year. Since the first of the year, 12 new stores have been opened and four additional stores are scheduled during the next three months. The showing made by this company, as well as Woolworth, May Department stores, the mail order houses and others of like character form a satisfactory indication of the widespread improvement in industrial conditions throughout the country. The Woolworth company is still receiving German, goods in large volume, but it is understood that shipments now coming in represent specifications against orders placed sometime ago. Since these orders were placed the tariff has been increased heavily, but even so the continued decline in German marks, which today again established a new low record for all time, will show the Woolworth company's representative of the same and the single reflected in good buying of the equipments. General American Tarik Car was up more than 3 points from yesterdays, low, and when it is considered that this company is the remendous shortage of freight cars in the country, and ast the same time regions supreme in the production of tank cars, this support is easily understood. Orders on the books at present call for about 10,000 freight cars, this business is worth a total of some \$20,000,000. At the present time the company is earning at the rate of \$12 per share per year, has ample working capital and not be received as the form the streets of Manhattan is the production of tank cars, this support is easily understood. Orders on the books at present call for about 10,000 freight cars, this business is worth a total of some \$20,000,000. At the present time the company is earning at the rate of \$12 per share per year, has ample working capital and not be

Eation.

Ent it is a long process when we remember the condition of countries under Christian regime. This morning a man who is constantly handling a waybange expressed the under Christian regime. This morning a man who is constantly handling foreign exchange expressed the greatest concern regarding France, predicting a decline in French money to 5 as against the present quotation around? He sees a country that has gone hugely into debt, counting on German reparations payments and not getting those payments, and otherwise piling up great liabilities with no visible method of meeting them. And France is by no means the worst off of the lot. The area of Europe much more desply submerged in debt is many times greater than that of the nations this side of the Rhine. There is possibly some significance in the proposed return of J. P. Morgan from Europe about the latter part of this month. A chance has existed that some plan of rehabilitation that commends itself to him would be formed, but advices from that quarter favorable to such an outcome have grown less and less encouraging. Americans are accused from time to time of not knowing enough about Europe to have a fair idea of its financial future, but the real trouble is that we know altogether too much about it.

The appendictive trade in European

real trouble is that we know altogether too much about it.

The speculative trade in European exchange has declined, present transactions being based on actual buying and selling of goods in the main. A friend remarked to an exchange broker today that probably he is not doing a great business in that line. He replied with mock seriousness: "I have just this minute sold 100,000,000 marks." Figure that transaction at 21 9-16 one hundredthe of a cent per mark and you are not much impressed with the operation. How this dealer regards these things may be indicated by an incident at his club. At the end of a game of cards he

dealer regards these things may be indicated by an incident at his club. At the end of a game of cards he pulled 16,000,000 paper rubles out of his pocket and tendered them in payment of a debt of \$7 or \$8. "Nothing doing, my boy," was the response.

Traders in stocks pay no heed for we live in another world. They are not troubled as marchants are who every time they buy in Europe or selin Europe must figure on the conversion of one kind of money into another.

The nerve action of the stock brokers and traders indicates a good deal of faith in the present level of prices, the market in their opinion not to be different from what it has been most of the time during the year though they have just gone through the largest reaction of 1922. They are looking for a gradual expansion of all those branches of business which bear on security prices and are as anxious as anybody for the railroads to get cleared up. Meanwhile not a single tear for the aultan has yet been discovered in this city.

C. B. EVANS.

Fenner and Beane Cotton Letter.

Separation until News.

New Orleans, Nov. 3.—Cotton broke some more precedents today and cilmbed to new high levels. Forecast of smaller ginnings than expected from the National ginners and predictions that the total ginnings will fall short of the governments last estimate nearly 700,090 bales was the uplifting influence. It looks like, however, the statement from the census bureau yesterday to the effect that foreign crop of cotton this year will not exceed last seeson's much over 137,000 bales paved the way for the advance.

The real bullishness of the situation lies in the possibility that the world's carryover of cotton of all kinds at the end of the season may shrink to as low as 5,000,000 bales.

What such a situation means will be readily understood when it is realized that the carryover of American cotton slone was \$3,54,000 at the end of 1921 and 4,200,000 last season.

FENNER AND BEANE.
