B. W. Kilgore, Director of the Farm Extension Service, in His Annual Report Gives Out Many Interesting Points On Livestock and Co-operative Work

(By Associated Press.)

Raleigh, Dec. 30.—A more extensive campaign for the increase of livestock and co-operative marketing will be promoted by the division of marketing livestock, according to its annual report submitted to B. W. Kilgore, director of the farm extension service, tonight.

"During the past few years," the report reads, "we have seen the livestock industry pass through many trials. During the war there was a great drop in the price of livestock and big game, and the farmers produced as never before. After the war there came a period of deflation and producers were found with considerable production on hand and the market went to pieces.

"The obligations the farmers had to meet caused great quantities of the products to be rushed on the market and many herds had to be sacrificed. In many cases, the younger animals were sold on the market in preference to older ones because they would bring more money. Later the older animals were forced on the market because they were no longer fit for breeding purposes.

"The deflation in prices and depletion of good breeding herds has to some extent reacted, causing the price of market animals during the past year to advance as will be shown from comparison of prices quoted from 'Livestock Market'.

	1922	1921	Advance
Top Steers	113.55	8.59	41.1
Top Yearlings	12.00	11.35	15.9
Feeder Cattle	8.00	6.75	18.8
Top Hogs	9.70	8.30	17.4
Top Lambs	14.82	8.75	68.8
Feeder Lambs	14.75	7.75	50.8

"The policy, this year, in livestock marketing work has not been so much to increase the herds, but in encouraging the successful marketing of animals of farmers at the present time.

"A year ago, we found that very little co-operative marketing of hogs had been done in the two preceding years. In fact, only Iredell county had shipped any hogs in this manner during that time.

"The office of swine extension was getting some excellent feeding demonstrations going in a few counties over the state, and since these demonstrations could be made the basis of making up co-operative car load shipments we gave assistance whenever possible in encouraging this work and handled these co-operative shipments.

"The work has grown during the year so that 14 counties produced and sold co-operatively 34 cars of hogs fed under the direction of the office of swine extension and sold through this office. There were other counties interested in this work but not to the extent of making a car in which the hogs were sold locally.

"One interesting feature that has been developed with regard to marketing hogs from this state is as follows: Last spring when corn belt hogs were worth 11 1/2 cents, Carolina hogs sold for 10 1/2 cents and Georgia hogs at 9 1/2 cents on the same market, the discrimination being made the very moment the place of origin of the hogs was determined.
