**NO BREAD TICKETS
 FOR AMERICANS
 IF INVADED**

There will be no necessity for bread tickets or meat diet restrictions in the United States, because the American farmer is prepared for emergencies. This is the lesson drawn from an agricultural preparedness survey just completed by Rock Island Lines, as a voluntary contribution to the movement for industrial preparedness, inaugurated by the Naval Consulting Board.

Emergency reserves of from 10 to 50 per cent in the supply of breadstuffs and pork are possible in most of the Central Mississippi valley states, according to statements made by directors of a dozen state experiment stations, and published in the July issue of the Southern Trail, the Rock Island's official farm magazine.

Mr. L. M. Allen, passenger traffic manager, who had supervision of the work, states that the outstanding fact is the ability of the wheat, corn and cotton states not only to sustain themselves, but to furnish the bulk of the nation's food supply and to make quick change in the farming program, should necessity arise. It appears, further, that the nation has available peculiarly efficient and convenient channels for reaching the farmer. These include state agricultural colleges and experiment stations, which are supported in part by the national government and the county farm adviser system.

In a summary of the survey, attention is directed to the economic links in American agriculture, such as the losses from animal diseases estimated by Secretary of Agriculture Houston at \$212,000,000 annually, the shortage of potato due to temporary shutting off of the German supply, the necessity for moving stock on every farm to conserve soil fertility and relieve the world-wide shortage of beef.

A NEW USE FOR SKIMMED MILK
 Now Being Manufactured Into a Covering For Shingle Roofs.

Chicago, July 13.—Instead of feeding skim milk to the hogs, farmers use it in the manufacture of a fire resistant covering for building purposes, especially shingles. This use of what farmers have sometimes considered practically a waste of the farm, is announced by Ernest McCullough, of this city, Fire Protection Engineer for the cement industry in an interview given here.

The interview was brought about by the recent suggestion that a mixture of cement and ordinary fine sand in a paste is effective as a fire resistant preparation for shingles, but it has the difficulty that the wood absorbs the water, and the dry sand and cement blow away.

The case in milk, it is declared, is the medium used to hold intact the pigments in cold water paint, so by using skim milk without water the integrity of the paste is assured.

Furthermore, this use of skim milk in the preparation of certain paints is said to have long been known to the trade as a trade secret. Now it is given out to the general public so that any farmer can cover his own farm building with a fire resistant paint made from the skim milk from his own farm, to gather with cement and fine sand. It also makes a water proofing paint.

TRADE REPORT OF FIREMEN PLAN TO ATTEND RALEIGH MEETING

Richmond, July 13.—Bradstreet's Saturday will say for Richmond and vicinity: Last month saw the beginning of the vacation and between-season quietude in wholesale trade. Manufacturing lines continue active and retail trade is good, particularly in seasonable commodities. Manufacturers continue to experience some difficulty in obtaining necessary supplies but this condition is being gradually improved.

Manufacturers of heavy articles are working at capacity and are now behind with their orders. Those engaged in the manufacture of trunks, bags and leather goods are receiving the largest volume of orders they have had within the past two years and are operating at full capacity where labor is obtainable. Manufacturers of tobacco and cigars are working at full time, and this the most important manufacturing industry here, is giving employment to the greatest number in its history. Lumber continues in fair demand, export and dimension grades being in good inquiry, but coastwise vessels are hard to obtain. Local railroad reports continue to show a steady increase in revenue, and few idle cars. Labor is well employed, actively in manufacturing lines, having rendered farm labor scarce and high in some vicinities. Bank clearings for June 1916 were \$70,226,000 in comparison with \$59,799,000 for the same month of last year or an increase of about 16 per cent. Statements of banks made in response to the governmental call of June thirtieth show a very satisfactory condition and in many instances deposits reach a high record. Total resources of the local Federal Reserve Bank have reached their highest figure thus far, amounting to \$31,101,880.00. General collections are good. Commercial failures in this district showed a slight decrease for June 1916 in comparison with the same month of last year. The produce market is at its usual seasonal dull period.

Crop Report
 Excessive rains during the early part of June retarded crop cultivation, but stands are generally good and favorable weather from now on will assure good yields. Cotton is a little late but in good condition and present indications are for an increased yield over last year. A full acreage of tobacco and peanuts are under cultivation. The acreage in corn is large and the crop in fair condition. Fruit is reported to be dropping badly and the yield will hardly reach that of last year. Pastures are in excellent condition. Cattle and hogs are being marketed and some damage to them by many weather is reported. Melons and other vegetables are plentiful and shipments are being made in fair volume at good prices.

INTEREST IN CASE OF SAMUEL STOCKS
 Kinston, July 13.—Solicitor H. E. Shaw, prosecutor for this judicial district, states that he cannot say whether the case of Samuel Stocks, alleged lyncher, will be ready for trial at the next term of Duplin county Superior court or not. Judge Bond Saturday ordered Stocks tried in Duplin. The grand jury must pass on the evidence and some other details be attended to.

There was called to the attention of Colonel Shaw an opinion expressed in street gossip that the state would root the investigation into the lynching of Joseph Black until after the trial of Stocks in Duplin county. At the week's ending July 24, or later, and that if the latter should be cleared by a Duplin jury the whole matter would be dropped. The solicitor stated that such would not be the case. Stocks is a small issue in the matter, he intimated. Men higher up are to be brought into the investigation. He would not permit when further action toward completing the investigation would be taken.

Sam Stocks, the only alleged lyncher now under indictment, is at his home in the Maury section of Greene county with forty-one prominent Lenoir county men, representing a total wealth of about \$1,500,000 on his bail. Other would be signers who have telephoned the clerk of the court that they would like to add their signatures, have been informed that the bond was completed Saturday and the prisoner released. The clerk evidently discouraged superfluous signatures.

Got a Frost.
 Louisville Courier Journal.
 "Lovesmaking goes better under a star than a tropical moon."
 "I loved my wife in '03."
 "That's where I made my mistake. I proposed at Glacier Lake."

Three companies of local firemen are looking forward with considerable interest to the sessions of the State firemen's tournament which are to be held in Raleigh starting on Monday, July 17. The city fathers at their recent meeting made appropriations available for attendance upon the part of every volunteer fireman in the city that desired to be present. The sessions start Monday afternoon and the delegation of firemen from the city fire club D. D. Daughtridge and Assistant Chief J. W. Thurman, will leave this city Monday afternoon next for Raleigh.

Rocky Mount will make no entries in any of the races or engine contests that are staged on that day and in fact, it appears that if the various city departments over the State continue to motorize their equipment these races are gradually being left to the smaller towns where hand and horse drawn equipment hold sway. There is upwards of a dozen members of the central fire department who expect to attend the meeting of the firemen while possibly half that number from the Gibson Hill and North Rocky Mount departments will go. This city is entitled to six votes in the convention, they being those of the chief, assistant chief, superintendent of public works, chairman of the fire department, aldermanic committee and two delegations from the central department. Company No. 1 at their meeting recently, named Messrs P. R. Capelle and J. L. Home, Jr., as delegates and Messrs. Fred August and Paul Jordan, as alternates. There is but one matter to be brought before the State firemen for attention by the local company and it is that of a poll tax exemption under the law, and it is expected that action will be taken on this about Tuesday or Wednesday, though the matter will, in all probability, be referred to the legislative committee.

MACKEY RESIGNS AS SECRETARY TO GOV.
 Miss Mamie Turner Appointed as Successor to Mr. Mackey by Gov. Craig Today.

By the Associated Press.
 Raleigh, July 13.—Joseph J. Mackey, Jr., executive secretary to Governor Craig, has resigned, it was announced today. He will be succeeded by Miss Mamie Turner, who had been employed in the State Department.

Everybody Dies Yet Few People Prepare for Death

Most people arrange their affairs as if they would live forever. Then Death, that has never had a place in their plans thrust itself into them; and their heirs, helpless women and children usually, must suffer.

The above is a fact. The Remedy is, name us as your **EXECUTOR** to settle your affairs.
