SCRAPS There has been an increase in the average amount of money brought into the country by immigrants. Heads of arriving families are able to show about twice as much money as they did before the war. Experimental scientists in the department of agriculture have successfully produced the tangelo, a cross between the tangerine and the grapefruit. It is said to be more tender than either, and to lack all the juicy excellence of the grapefruit without the tendency to fly into the face of the spoon manipulator when the grapefruit is being eaten.
