FOR SALE

650 Acres of Land

ON the Northeast side of the North-west River, about twelve miles above Elizabeth-Town; it lies very wide on the river and has as great a proportion of good Land, according to the number of acres, as any tract on said River. There are on the premises, a valuable Grind Mill, Dwelling House and out Houses.

As the above mentioned Land has been previously advertised for sale in this Gazette, I deem it unnecessary to enter into further particulars. Any person who is desirous of purchasing good Land on the said River, will meet with a great bargain, as I am desirous of seeing the Western Country.

The terms of payment will be made easy to the purchaser.

There is a likely crop of corn on the Land.—If the purchaser lives at a distance, and wishes to purchase Corn, I will dispose of one half the crop on lower terms than any other in the settlement.

Excellent Saw Mills for Sale.

ONE half of a valuable Estate in Mills, built by the late Peter Mallet, Esq. and the Subscriber, on Black River, below Fayetteville, on the road to Wilmington. Across the river is a permanent dam, on which are two Saw Mills, which work four saws, with each a separate running gear, and have cut 18000 feet of lumber in a week; and a Corn mill, well supplied with custom. The Mills are new and well built, are constantly supplied with an abundance of water, and protected from frosts by a natural wall way. The river extends 40 miles above the Mills; logs can be floated to them from a great distance, and rafts go from the top of the Mills to Wilmington. 16,500 acres of Land, covered with pine, cypress and oak, and adjoining each side of the river, are connected with the Mills; 1000 acres of which of an excellent quality for rice, may be drained and watered by a dam at the wall-way. The upland, abundant in lightwood, and tar and turpentine may be made to advantage.— There is no situation in the State, which combines equal advantages for the manufacture of pine lumber, naval stores and rice, where there is sufficient water to transport every thing to market, and the Mills are so perfectly guarded from the danger of floods. An equal undivided half of the whole property, with a few Negroes, flock of Cattle, Blacksmith's Tools, a number of Oxen, and all other things necessary about the Mills, are to be sold on a liberal credit, to suit the convenience of the purchaser. For terms apply to Mills. John Winslow and John Eccles, of Fayetteville, who are fully empowered to sell the same.

GILES & BURGWIN.

Wilmington, July 15, 1805.

John Le Tellier,

DENTIST,

INTENDS visiting Wilmington in the month of August or five weeks, at which time he will offer his services to the inhabitants and its vicinity, in the various branches of his profession, particularly in CLEANING and RESTORING the TEETH to their natural elegance, with instruments that cannot injure the enamel. In transplanting real teeth, so as to be permanent, and setting artificial ones with ivory, that will not change to an unnatural color; in plugging hollow teeth, and reinfusing those with the gums that are much depreciated by carelessness, or corroding medicine, and extracts such as are too far gone to save; in which operation of extracting he makes use of BRUFF'S Patent Perpendicular Extracting Instruments,

Which take the teeth out with a much greater degree of less pain, than any other instrument hitherto invented; fastens those that are loose, (unless waited at the roots) regulates them from their cutting in children, assists nature in the beautiful arrangement of the second set, and preserves them in their natural whiteness, entirely free from all scorbutic complaints.

To know if your teeth want cleaning, examine them before a glass in a clear light, beginning at the two middle front teeth of the lower jaw; if the gums are departing from their former place, or a black or yellow crust adhering to the teeth, you have cause of alarm, as that corrosive substance called tartar, will cause an offensive breath, decay the teeth, produce scurvy, or consume the gums and bony parts till the teeth drop out.

N. B. He has DENTRIFICE of a superior quality for sale.

June 25, 1805.

CERTIFICATE.

Mr. LE TELLIER makes use of the proper method of cleaning the TEETH, without injuring the enamel, and is authorized by me to use the Patent Perpendicular Extracting Instruments in all places where the right is not disposed of, and not within fifty miles of Washington City, the place of my residence.
