

object must be to drive off or capture the blockading vessels, form a junction with the Ferrol squadron, and then proceed to the attack of the Channel fleet. Should Lord Nelson proceed to the Mediterranean, or not arrive in time to check the career of his flying foe, the consequence may be of a most alarming and fatal nature to the safety and prosperity of the British isles.—*N. Y. paper.*

Most of our readers will recollect the capture of the ship Golden Grove from this port to Liverpool in May last. There have always existed strong suspicions that the privateer which captured her, was fitted out in this country, which suspicions are now confirmed. It appears that the Golden Grove went out in company with a number of vessels; among others, a small schooner which was observed in Hampton roads for six or eight days, of which no notice was taken, until Cape Henry bore S. W. distant about five miles, when the schooner ran along side of the Golden Grove, hoisted Spanish Colours, fired one gun, and a volley of small arms, and boarding made prize of her. It now appeared that the schooner had four guns, which had been concealed by throwing sails over them, had 37 men, most of whom were concealed in the hold. The privateer was commanded by an American, one Hooper, there were also many other Americans on board, whom the Captain and officers of the Golden Grove recognized, as having been seen in this place, going on board the different British vessels under pretext of inquiring for passages, but with a view to ascertain their force and time of sailing.—*Norfolk Herald.*

A letter has been received from Cadiz, dated June the 23th, which is altogether silent as to the rumoured condemnation of one of our gun-boats. The Adriana, which brings this report, having arrived at New-York after a passage of 40 days renders the report very doubtful. This letter is from our Consul at Cadiz and as it does not even mention the capture, it is probable that her immediate restitution made that circumstance, in his opinion the less important to be stated.

Mr. Bowdoin, our minister to the Court of Madrid, had arrived at St. Andro previous the 28th of June.

The Leyden Gazette (*French*) of June 7th contains the following paragraph respecting the late act of Batavian Republic prohibiting all commerce with Great-Britain.

"The publication relative to the Commerce with Great-Britain, decreed the 31st of May, by the existing Legislature of the Batavian Republic, is very singular and particularly interesting. It prohibits entirely, and in the most severe manner, all direct navigation between this Republic and the Enemy's country, and prescribes the strictest precaution against all indirect exportation from Great-Britain of warlike and naval stores and provisions; likewise against the importation in any manner whatsoever, either by land or water, of all produce of the industry of England."

By a letter received at Boston from Paris, it appears Jerome Buonaparte was presented to his brother Napoleon at Milan, the day before his coronization, and received into full grace and favour. It is said he is to marry the Queen of Etruria. His American wife is there called Miss Patterson; she was forbidden to land, and ordered immediately back to the United States. A pension for her is spoken of. This is the morality of Monarchs!

#### Advice to Planters of Tobacco.

THE Inspectors of Tobacco in the Town of Fayetteville, take this method to solicit the attention of those who may bring their Tobacco here for Inspection, to notice the following particulars: 1st. We advise that the Tobacco be put up in dry order, clean of dirt, and bad leaves.

2dly. We advise the people, to avoid the bad practice of mixing good and bad, long and short Tobacco together.

3dly. That the Tobacco be carefully separated; that the short and most indifferent be stemmed and prized straight and loose. The stalks must be well seasoned and the size not to exceed thirty-four inches across the head, and fifty-four inches in full length of flaves. The pins in the rolled hog-heads must be seasoned likewise and not too large, nor more than will answer the purpose.

By attending to the above, the Planters will find themselves much benefited by the price of said Article; the Inspectors will be relieved from refusing Tobacco; and the character of Fayetteville Inspection will be retrieved.

The Inspectors think it their duty to give this information in order to save trouble and expence to the Planters of Tobacco, as an alteration must be made in the business.

#### Excellent Saw Mills

FOR SALE.

ONE half of a valuable Estate in Mills, built by the late Peter Mallet, Esq. and the Subscriber, on Black River, below Fayetteville, on the road to Wilmington. Across the river is a permanent dam, on which are two Saw Mills, which work four saws, with each a separate running gear, and have cut 18000 feet of lumber in a week; and a Corn-mill, well supplied with custom. The Mills are new and well built, are constantly supplied with an abundance of water, and protected from frosts by a natural wall way. The river extends 40 miles above the Mills; logs can be floated to them from a great distance, and rafts go from the foot of the Mills to Wilmington. 16,500 acres of Land, covered with pine, cypress and oak, and adjoining each side of the river, are connected with the Mills; 1000 acres of which of an excellent quality for rice, may be drained and watered by a dam at the wall-way. The uplands abound in lightwood, and tar and turpentine may be made to advantage.—There is no situation in the State which combines equal advantages for the manufacture of pine lumber, naval stores and rice, where there is sufficient water to transport every thing to market, and the Mills are perfectly guarded from the danger of floods.
