All prizes not demanded within 12 months after drawing, will be considered relinquished for the benefit of the institutions.

The above Lottery is authorized by an act of the Legislature of North Carolina, for the purpose of enabling the Trustees of the NEWTON ACADEMY near the town of Asheville, to complete the necessary buildings belonging to the same—And also to establish a Female Academy in the town of Asheville.

Which two objects the Trustees and Managers flatter themselves will be a sufficient inducement, independent of the flattering prospect held out by the above SCHEME, to influence all zealous friends to useful Institutions to become liberal purchasers of tickets.—And they deem it unnecessary to expatiate largely in contrasting the advantages these institutions may have (if well supported with friends) over most other Seminaries.—For it is now very generally known that Asheville is one of the most healthy situations on this continent—and lying in the neighbourhood of the Warm Springs, and on the main road from thence, (as well as from the Western to the Southern States) is more generally resorted to by the best characters of both sexes during Summer and Autumn; (for the benefit of health) than almost any other place in the Southern section of the Union.—And being also a place where board and tuition are had on very moderate terms.—Where the youths of the sister states will lay the foundation of sound constitutions together with their educations, and receive the visits of their friends to and from the Warm Springs.—All these advantages united bear evident testimony of the eligibility of Asheville as a seat for Literary Institutions.—And therefore on these self-evident grounds, we respectfully solicit the public patronage.

HISTORY OF PRINTING.

THIS work, by the senior Mr. Thomas, of Worcester, Massachusetts, is now completed at the press.—As no opportunity was given to those gentlemen, who wish to be supplied with these volumes to engage them by subscription; and as many, particularly printers and booksellers, in various parts of the continent have expressed a desire to possess copies, this is to request those who are inclined to become purchasers, to send in their names to Thomas Henderson, jun. & Co. in Raleigh, by the 14th day of October next ensuing, when a return will be made to the publisher of the work in Boston, and the number of copies which may, by that time be engaged, will be immediately forwarded.

Among many curious and interesting articles relative to Printing, &c. these volumes contain an account of ancient manuscript books, and the method of bookmaking, before the discovery of printing—of illuminations by the scribes—of ancient and modern engraving and paper making—of the practice of printing in China—of the discovery and dispersion of the art in Europe, with a brief account of ancient printers and a list of the first who practised the art in Europe, Asia, Africa and America—ancient Colophons used by printers—the introduction of printing into the various parts of the United States, and the colonies of foreign nations in America—a biographical sketch of all the printers in the English colonies from the first settlement of each colony to the period of the revolution—memoirs of persecutions for libels—an account of all the Newspapers that were published before the revolution; and a list of all that are now printed in the United States, with a calculation of the number circulated annually—an account of paper mills and the quantity of paper supposed to be manufactured yearly—new invented printing presses, with a description of one called the patent circular press, calculated to carry six or more forms, and to be worked by water, or by means of a horse, of which a successful experiment has lately been made from the model of the inventors in Boston. In these volumes are interspersed anecdotes of printers, &c. and many particulars not before published relating to the History of the country, & others which aided in bringing forward the revolution. To which is added an account of all the booksellers in the colonies, now the United States, from the first settlement of the country to the year 1775.

The work is in two volumes, &c. containing 1060 pages, well printed on yellow paper, and has five plates, one of which is a fac simile of the first article known to be printed in Europe by the discoverer of the Art of Printing; two are fac similes of the printing types first used in England, another represents cylindrical printing presses accompanied by a description of them; the fifth is an Indian Gazette. The price of the two volumes in boards, is six dollars; or six dollars seventy-five cents, handsomely bound.

As a small edition only of this work is published, no more copies can be forwarded than may be actually engaged by the time above mentioned.
