### My Negro man Bealer,

WHO some time ago advertised for my name, and for whose apprehension a reward was offered by advertisement in the Star, was drowned into custody a few days ago by some of my friends employed for that purpose, under the pretence of running him out of the river, and he is now confined in Raleigh Jail. I claim in this public manner to return my thanks to my neighbors for the zeal they have manifested in kindly assisting me to apprehend this daring monster, who it is hoped will suffer a punishment due to his crimes.

## Lamps and Lamp Oil.

### HENDERSON & Co.

HAVE for sale elegant Lamp Lamps with brilliant Patent Reflectors, and common Lamps, with single and double wicks.

ALSO,

A quantity of best Winter-pressed Lamp Oil. The advantages of lamps over candles are, that they are much less expensive, give no trouble in trimming, afford an offensive smell, burn with a more steady flame, without that glimmering which in candles is so injurious to the eyes, are more cleanly, and are not affected by the wind, which in the summer season, when the windows are necessarily kept open, makes candles extremely troublesome. The snuff of candles is also common, and flames and houses have been destroyed by rats carrying off an unextinguished candle. None of these dangers attend lamps.

## ELEGANT BOOTS,

OF the newest Philadelphia fashion, for sale at the Star Store, Raleigh.

## Congress.

### IN SENATE, December 17.

Speech of the honourable Mr. Giles, on the motion of Mr. Anderson, to strike out the word "ten," for the purpose of inserting a smaller number of Regiments, in the bill to raise an additional force.

(Continued from page 20.)

Mr. G. said, upon an impartial view of all the considerations he just had the honor to suggest, he thought it was demonstrated, that the force proposed was not more than competent to the objects of the government—and that a smaller number would correspond, neither with the national spirit nor expectations. He would therefore protest to consider, whether that number proposed, exceeded the national capacity to furnish.

It will appear, said Mr. Giles, from the census lately taken, that the population of the United States is perhaps not less than seven and an half millions of souls. Now, sir, this must be a population of a most extraordinary character, and under the influence of a government of a most extraordinary organization, if it cannot command the services of 36,000 men, upon the most extraordinary exigencies. But we are not without a most excellent experiment upon the present and former governments of the U. States, at a former period. In 1775, 1776, we commenced the revolutionary war with Great Britain, with a population very little, if at all, exceeding two millions of souls. Let us see the number of regular troops, not merely voted, but actually brought into the field, and paid for their services during the whole of that war. They are as follow:—Total in pay, in 1775—27,443; in 1776—46,891; in 1777—34,020; in 1778—27,899; 1780—21,015; 1781—15,292; 1782—14,256; 1783—13,476. These are the regular troops actually in pay, exclusive of militia.

In making this comparative estimate, he was willing, in these degenerate days, to give two, nay three for one; over the population of 1775 and 1776; and it would appear, that the committee had not drawn upon the existing population beyond moderation. With a double, nay threefold population, with more than quadrupled pecuniary resources, with a capacity for furnishing munitions of war above one hundred fold, the committee proposed to draw upon the existing population for 33,000 regular troops in the whole. In 1775, there were actually in the field and paid, 46,891 regular troops, exclusive of militia. Great Britain, with a population of but little more than double that of the United States; labouring under a debt of more than
