### Foreign Literature and Science, Published by E. Littell, Philadelphia

Is composed entirely, as its title implies of se lections from foreign Journals. A few words may show that it is however far from being adverse to our own institutions or literature-and that on the contrary, it may have an importan effect in preventing the dissemination of doctrines in dissordance with the principles upon which our society is constituted. Some of the British Reviews and Magazines are reprinted in this country exactly as they appear at home, and ther, as well as those which are not published here, embrace much matter of little interest and no advantage to our readers—and which is not unfrequently fixed to vitiate their literary faste, their morals, or their political principles. But while it cannot be denied that there is in all these foreign Journals a large part which con-sists of details and speculations which are uninteresting to merican readers, or mischevious in their political or moral tendency, it is equally Bons and Vests, of all descriptions.

These goods were lately imported from New-York and Philadelphia; all of which will be sold at the most reasonable prices for cash.

N. II. Geutlemen wishing their Clothes made at Major Cook's Clothing Establishment, Newtion—that will "raise the genius and mend the heart". And when we consider that the great est philosophess and stateamen, as well as poets, critiss, and all other men of literature, now find the periodical press the channel through which their opinions can be conveyed with the greatest their opinions can be conveyed with the greatest certainty and effect to the greatest number of men, it will appear very evident, that a knowledge of what is thus written and down abroad in necessary to the successful cultivation of our own literature, and important to the politicism, schoolar and tuan of business, as well as to him with reads only for a musement.

The persons who reside at a distance from the great depositories of New Books & New Inventions, a work conducted upon this plan is peculiarly important, as affording to these as apportunity of keeping pace, in some degree, with the progress of knowledge, at a very trifling expense of money or time.

His presumption in attempting to dictate to the Jews from such a diagram of the status)—and it deprives the law it contest, and his advice to those in the different European armies, put me in mind of Manchausin's man, who, at 15 miles, set a mill to work, merely by miles, set a mile to work miles, set a mile to work miles of miles and the miles of miles an brethren, pretends to divine right, these high and respon all this, he proceeds to usurp the office of High-Priest, and his mandate is sufficient to alter even the laws of Moses. One passage pleases me much, where he intends togather the Indians into his fold. How lucky would this be for our Geor-gia neighbors, could they but persuade the Creeks to place themselves under the wing of the Judge of Israel! What expense would this save to the United States! I think the offer ought to be made to them.

But to view the matter in a serious ight, I am afraid the Jews will not trust one, who, in the beginning, taxes them without their consent, and who affects such arbitrary power. Much more might be said on the subject; but I consign his proclamation to a certain gentleman in New York, who, no doubt will do every justice to it. In fact, Mes-srs. Editors, his plans & proclamations are like the 'far famed Gregor M'Gregor,' the carique of Pavais, atike defusive and visionary; and they suit no other meridian but that of Vienna, St. Petersburgh or Constantinople.

Newburg, N. Y. Oct. 4. Drowning .- We give the following account of the management of two drowned persons for the information of those who are called on to take charge under similar circumstances. On the 11th, an old man of the name of John Cole, fell from the dock at Fishkill up-per landing, opposite this village. He was taken out of the water in a few minutes—was yet warm—and had many symptoms of returning life; but the injurious means adopted to restore him, such as rolling on a plank and barrel, finally destroyed all vitality. The inquiry and experience which this danguiry and experience which this danguir and experience which the supplier of the control of t

gerous experiment led to, was found of the utmost consequence, and quite a different course of practice inculcated among the actors in this tragedy, for their future guidance.
On the 18th, a boy of Mr. David Monday, the 26th ultime, Mr. Camp of-fered as a substitute a resolution—" that years old, had been missing for some no law shall be passed, at the present time, and was found in the river.
