PEFERRED ARTICLES.

"Signal of the Timer."-O, M'Glasham has Alasan N Y. with the foregoing title. "This journal (says the prospectus) is to be a ablabled for the promotion of sound, republican principles, and to a d the election the hepublican Gambate for the office of the licepublican Gambate for the office of the licepublican Gambate for the office of WENON, of Tennessee. The friends of feoted his escape, and we understand a Gen Jackson are very numerous in this State. large coward has been offered for his ap-ationly require a proper understanding with prehension. He has been offered for his ap-int other to co-operate with signal success. past nated for his blood thirstu disposi-- Elicop designs to fully enter into the inter the circumstances attending the elecan of Mr. Adams He professes to make tion .- Patriot. this his particular determination, and with the

os stance of several gentlemen well qualified or the task, to lav before the people of this state the true merits of the approaching subneersy, and to endeavor to place before them the have and antidote of the times." " The questions now to be discussed by the

propile of the United States, are--Shall pristeps to honor and distinction? Shall public min and all the will of the people be obey of or not? Shall the administration of go ment he sustained by emissaries and ofo 1 agents, or Ly its own merity Shall of. tors, foreign and domestic, be created to be fiel by political dependents? Shall the rights of the States be bartered away to increase the patronage and power of the genetal government? And, lastly, Shall republican principles he maintained in purity, or be conaminated by new and speculative theories?"

## Hillsboro', Sept. 19.

At the Superior Court held for this county last week, andge STRANGE presuling, David Hobbs was tried for kill ing John Check in July last. The evidence offered, exhibited the

following facts, which we briefly recapitolate: 0#

Habbs, and Cheek the deceased, with at the Matherbank from a voyage a-several others, were at the tax gathering Found the world, in two years. In the as Brown's Mill, and in the evening Marquesas, an officer and two men became much intoxicated. Soon after were murdered, without provocation, sun-down, they set off together towards by the savages. Home; Hobbs and another person quarrelling. After they had passed some little distance, Cheek called to Hobbs. and said he could whip him. This peared desirous of fighting. For a scientific ensemble, it deserves a ready credit. We should like to know the quantity of brass which is incorporated in the system, either in approaching each other by two of the blood or bone, of some individuals. by standers; but Cheek being a strong man, at length escaped from t person in vain made use of to induce them to go home; and for, twenty or thirty minntes irritating language passed between them, Hobbs still holding the kuife open in his hand, which he refused to part with or to shut. At this time they were standing on the side of a half, about eight or ten steps apart. Willis Cheek having been unable to persuade go home, went to Hobbs with the intention of forcing him away, and took bold of him, and pushed him two or three steps his head, and they both fell, and John Cheek with them. Willis Cheek in-stantly rose and pulled up Hobbs, but John Check was held down by one of the persons present, who was anxious to prevent the fight. It was soon ob-served that blood was flowing from Cheek, and he was suffered to rise, but he again immediately fell, and in a few minutes expired. As soon as the blood was observed, Hobbs left the place and larly with regard to the state of Alabama, I went home, without saying any thing, leaving his hat, waist coat, gun and shot-bag. On examination it was found ing within their scope this part of the Territo-that Cheek had received a deep stab ry of Florida. Ans. 7th. 1 advise and recommend a society

Kerr has; since the murder, c

past noted for his blood thirsty disposition, and has been guilty of more than one recent attempt to commit assasina-

From the Beooklyn Star. Grapes .- The North Carolia purple ovat grape, known here as the Isubella grape, is in very luxuriant bearing in many of the gardens in this village. A friend has handed us five large bunches on a stalk of one foot in length, and not

bigger than a pipe stem. We are sorry to say that the foreign grape vines of Dr. Vandeveer, at Flat bush, which have in former seasons yielded abundance of the finest fruit, are blasted for the present season. The green fouit burst open and withered, & he leaves (and in some instances the small branches also) changed to a brown color and dropped off, Whether this may have been owing to the wet season,

or to any peculiarity of the climate, is a question of some interest, and we hope the friends of the vine in different and distant parts of the country will interchange their information and experience on the subject.

Russia .- Baron Wrangell, of the On the 26th of July last the prisoner Russian corvette Krutky, has arrived

from in the System .- Dr. Goad, in his Book of Nature, tells us that there is iron enough in the blood of forty-two men to make a plough-share and said he could whip him. This —weighing, generally, from 22 to 24 lbs. This brought on an altercation, and they is a singular proposition; but as the learned doc-both soon became very angry, and ap tor is a genuleman of high respectability, and deep

Female Massury .- A little pamphlet has been man, at length escaped from the person holding him, and struck Hobbs a heavy blow on his head, and tore his waist coat and shirt; when they were separa ted. Hobbs then drew out a pockel-ted. Hobbs then drew out a pockelted. Hobbs then drew out a pockets however, remark, that we have every reason to knife, and threatened if Cheek, laid his believe the work to be genuine, and a correct statement of the mysteries as practised in England, France and Germany. We may have lodges of Masonestes in this country shortly. Bunker Hill Aurora. MIDDLE FLORIDA. A respectable family in Switzerland have applied to General Lafavette for his opinion and 75 and 60 in the night time. In point o respecting the facilities of a settlement in Alabama or West Florida. A letter from the General to Mr. Duval, Governor of Florida, of the U. States The climite resembles encloses a series o questions from them, rehis uncle John Cheek, the deceased, to specting that territory & Florida & Alabama, which, at the request of the Governor, have been answered by David B. Macomb, Esq. a member of the "Florida Institute of Agricut-which continue from the middle of July to down the hill, when he felt a blow pass ture, Antiquities and Science," in the following letter

no views weeds must partly kept under, than in Alahama or Georgin, a circumstance of no-small importance to those why intend to cul-tivate proprise sumbar. Ans. 6. Were such a colony of Swiss as

lescabed in the question, to establish them elves in this section of country, they would ervoral the prohability" of a doubt, succeed ": their enterprise - There is no part of the continent of North America where the es-inte and soil are so peculiarly adapted to the culturation of the vine, as the Middle histrict of Florida. Nature has been proher comomy. A common observer can readily distinguish 8 or 10 different species of the vine in our forests, where they grow

and flourish most luxurieatly and bear abunlantly, for wild grapes. Our woods are interally covered with the various kinds of vine, a sure indication that the grape will succeed, when mittured and dressed by ex-perferced laborers and cultivators. Whole fields of uine can be shown, whose age can-not fall short of 100 years. In some few in-stances the large French blue grape has been ingrafted upon the root of the wild grape, in statu que, & they have produced the first year of their engrafture, the second, one bushel of grapes from one vine, & the third year a large crop is anticipated. There is conse quently no part of the world where a vine-vard can be established with so much expelition, with so great certainty of success, and with so comparatively small expense. But our population know searcely nothing of the manufacture of wine, when they have grown the grape in abundance. They have had little or no opportunity of acquiring ractical information on this important subect; nor would they be disposed to enter to a business of this kind, as it requires too long a time to bring their labor to a prolitable issue; it being prevalently understood among us, that it requires five years to establish a vineyard. All the different speies of foreign grape that have been planted a this section of constry, have succeeded

vell, and, no doubt, will produce in due time, and with proper pruning and and dressing; a aranch of knowledge very little understood here, and consequently a source of great profit to the possessor. The first successful establishment upon a respectable scale - m Florida, will realize an independence in a

few years. Ans 9th. Knowing the peculiar habits and disposition of the European laborers, and at the same time their inaptitude to manage the axe at first, an instrument first in rank and usefulness in levelling our forests, I advise that as many strong, able-bodied and indus trions laborers he brought over from Switzerland as possible; but that only a slight dependence at first he placed upon their operations in such of the labors as our native inhabitants are more expert in; such as the

re is no difficulty Ans. 12th, Th mg of dispnain day a slight eight ta will be suffic ta will be sufficient to satisfy an bla midd on this subject. Our the seaboard and our extensive of the seaboard and our extensive coast shared with fine have and harbors, give regener-advantsever in this respect than any other part of the United Status. We have a officies of Oubs for a market for our live stock, provisions and Junicet, and of New Ocleans, New York, with all the southern ports, for our outcast and sugar and fruits. Tallahassee being ouly 20 miles from St. darks, a nort of entry and delivery for ves-sels drawing 11 bet water: with sour color sy, you can come direct to the place of your settlements of hustantics. There are thou-saults of acres of good incultivated land to be buyght within 20 or 30 miles of this place, at frain 2 to 5 follows per acres in a country which, for health, good water, variety of sta-phen and other productions, beauty and ele-

ale and other productions, beauty and ele-vation of situation, extent of prospect, for tility of soil, facility of tillage and cicinity to ea board, is not exceeded by any part of the United States of America. Tallahastee is in attlude 30 40. attude 30 40. Ana 13th. The Territory of Florida is susceptible of rearing more large and small

attle, probably than any other partion of equal extent in North America. They are raised with very httle fromble and expense; the winter being so mild, and the fronts so slight and of so short a duration, as not to attect the wild beringe (called the cattle ran 'e.) consequently we are not under the necessity of laying up a stock of provender for then during the winter seaton. The natural or wild grasses are abundant and extrearly antria ous, and continue in a verdant state throughout the winter. The artificial "asses such as Licerns, Sanfoin, &c. and clover, sat having been introduced as ret-although there is much reason to believe that success will attend their cultivation, particularly the last, two kinds of (orange and white) are indigenious. Guinea grass has been cultivated with great success indeed I have no doubt, such is the luxuriance of this grass and the neutritive qual-ities it possesses, that it will supersede in this country every other artificial grass.-Goats and sheep are reard with ease and success, the wool of the latter, on sheep of common blood, such is the amounty of the chinate, improving in texture and fineness every year, a fact (as well as all others sta

MR. ADAMS AND THE FEDERALISTS

AVID B. MACO

OF NEW ENGLAND. Those of our realers who have read this journal from its first establishmen/, will recollect that Mr. Randolph, in the Schate, about the time that Mr. Clay called him to the field of battle, we be heve the day before the duct, with the most in previously or insequences of that womb it fail before it a. detailed the manner in which Mr. Adams deserted the federal party in "your "G 1807. The facts were given in a fetter from one of the first men in Va. to whom they were detailed by Gov. Giles, and were as follows: Mr. Adams and Mr. thies were by accident associated on the same committee—and sometimes nide tog ther in Gov. Giles' carciage. Mr. Adams became serious, anxious, & seemed weighed down by some weighcare. He broached the subject to Giv. Giles and told him that he had a matter of great importance which he mught it his duty to relate to Mr. Jefferson, then President, but did not know how to approach him, and desired Gov, files to make the communication-Me Giles to make the communication - sir Giles encouraged him to do it himself, which he at length did. Mr. Adams then told Mr. Jofferson that the Feder-alists of New England were plotting, with the Governor of Canada, a treasonable secession from the Union; that their schemes had been disclosed to nim; that he had once believed them to be patriotic in their views, but could no

longer act in concert with them. Mr. Randolph read this letter andibly, and called upon the reporter for the In- letter to Mr. Rush.

talligencer to mark its contents. We then knew that Mr. Adams would not permit the Editors of the Intelligencer
