NZW—The man I been in love with is mighty funny. A woman came to town and now he tells me it is his wife. Should I believe him?

Ans: Yes, you must. Have nothing more to do with him for he legally belong to another.

BHC—Please tell me about what year you think my brother will get out of prison?

Ans: Sometime during the year of 1938 provided he continues to behave well. At his age this can be forgotten for he isn't going to take any more chances in the future of going to prison.

Ans: Absolutely. The month of November will be an ideal time for you to carry out your present ideas. The move that you are about to make is a mighty good step to take.

JB—Is it possible that I will ever regain my health or must I continue on in this same state?

Ans: It is highly possible that you could be entirely relieved of the condition you are suffering with but it will be necessary for you to consult with a doctor. To do nothing about your bad health is a sure way to never be relieved.

WFR—I was corresponding with a fellow and he has promised he would come and marry me? Should I depend on him or will he fail in his promise to me?

Ans: Wait on him another year and he will fulfill his promise but right at this time he isn't at all well off financially to support a wife. This fellow owes you just as devotedly as he claims.

BEJ—Will I be successful in getting a job soon and will it be in this city?

Ans: You will . . . and it will be right there in your present city. The job will be caring for a small child—and you will really enjoy work.

FB—Was it anything that my wife did that caused her death or what did cause it? Was she true to me?

Ans: She did nothing whatsoever (bring on her death. It is just one of those cases when your time comes—why doubt her sincerity now. You know perfectly well that she was true to you.

AMQ—Am very much in love with a girl who has just finished college. Will she marry me?

Ans: I am afraid she won't. Her failure to answer your letter is just a nice way of saying she isn't interested.

NEXT TO LAST HOUSTON MARTYR IS RELEASED

NEW YORK, Oct. 21—Robert Tillman, former member of the 24th Infantry who was sentenced to Leavenworth prison as a reparation of Tillman's sentence had been released from prison. The Adjutant General's office of the War Department advised the National Association for the Advancement of Colored People on October 12 that the unexecuted portion of Tillman's sentence had been remitted and he is a free man.

Ask That Negro Be Admitted To All Branches

NEW YORK, October 21—Following up the Chicago speech of President Roosevelt, in which he scored the activities of aggressor nations and implied that democracies and peace loving nations must be prepared to enforce peace, the NAACP has written Secretary Harry H. Woodring of the War department, and President Roosevelt urging the removal of all discrimination in all branches of the military and naval services of the U. S.

The NAACP letter warned that in the event of a war crisis, the Negro citizens of the nation would not endure the humiliation and insults which were heaped upon them and their soldiers at the time of the World war.

The NAACP has maintained that Negroes should be admitted to all branches of the naval service and all branches in the army. Several years ago, in reply to the association's frequent letters on this subject, the war department used the excuse that Congress had created only two regiments of Infantry and two regiments of cavalry for Negroes and that the war department had no authority to create additional units. The NAACP maintains that colored men who desire to enlist should be admitted to any and all branches without creating special branches by act of Congress.

TRACT No. 1.
man.

The NAACP is in the final chapter of its long campaign for the release of the famed Houston martyr. Only one man still remains in Leavenworth, Stewart W. Phillips. Mr. Phillips would have been released years ago, but he escaped from Leavenworth and had five years of freedom. He was arrested and returned to the prison and naturally is having a harder time securing a parole than he would have had had he not escaped. The NAACP is continuing its efforts in S. W. Phillips' behalf however and is hopeful that the War Department will see fit to release him before very long.

Monster Hydraulic Press Speeds Fabrication of Airplane Parts

CONFRONTED with a rapidly expanding demand for its commercial transport planes, the Douglas Aircraft Company has installed the world's largest high-speed hydraulic press in its plant at Santa Monica, California. With a pressing force of 10,000,000 pounds, the huge press is as versatile as it is powerful, being capable of performing a total of several thousand production operations in the shaping and forming of parts for the Douglas planes.

Transportation of the gigantic machine to Santa Monica from the plant of the Hydraulic Press Manufacturing Company at Mount Gilead, Ohio, where it was built, presented a difficult problem. The press stands as high as a four-story building and weighs nearly a million pounds. The head alone weighs 175,000 pounds, the bed nearly 150,000 pounds; the ram more than 40,000 pounds. No single land transportation device ever built or imagined was capable of carrying the full weight of such a load.

The problem was solved by disassembling the press and mounting the parts on nine special flat cars. To move even the disassembled machine into the Douglas plant it was necessary to tear away the front and part of the roof of the building in which it was to be housed. The sandy soil upon which the plant is built had necessitated construction of a special concrete foundation.

The machine's pressing force of 10,000,000 pounds is created by a single hydraulic ram, six feet in diameter and actuated by oil under a pressure of 2500 pounds per square inch. Mounted on top of the press, the oil supply reservoir holds enough oil to fill the crankcases of 2000 motor cars. Pressure is generated by a battery of four radial pumps of the variable reversible delivery type, driven by two 150 horse power electric motors.

When officials of the Douglas Aircraft Company first considered use of a hydraulic press as a means of applying interchangeability, flexibility and greater manufacturing economy to the fabrication of aircraft parts, a miniature press was constructed to test the possibilities. So satisfactory was this test that an initial 2000-ton-pressure press was installed two years ago.

Installation of the new press enables the company to shape 3000 airplane parts—all of aluminum alloy—on its hydraulic presses.
