## Sigma Theta Sorority Plans Jabberwock

Alpha Lambda Chapter of Delta Sigma Theta Sorority is making final plans for the JABBERWOCK which is to be presented on Friday, April 15, in the B. N. Duke Auditorium, at North Carolina College for Negroes.

This event is sponsored annually in various cities throughout the United States, where chapters of the sorority are established. It is the sorority's national project presented for the benefit of its scholarship fund. The proceeds from the local affair will go to aid some deserving young woman who attends North Carolina College.

The "Jabberwock" is a legendary creature found among the pages of Carroll's "Alice in Wonderland." This mythical creature was composed of many varied parts which made it a part of unusual fascination.

The program consists of different dramatic skits presented by all of the local chapters of the Greek letter fraternities and sororities. The various types of entries will convey the idea of the composite nature of the Jabberwock from which the program derives its name.

This unique program is so arranged as to ensure variety and entertainment of a distinctive nature. Each entry as presented by the Greek letter organizations will be competitive with the others participating on the program. Prizes will be awarded to the group that, in the opinion of the judges, presents the most satisfactory performance.
