

Religious Leader To Visit YWCA This Month

DURHAM — A growing sense of the fellowship of all religions people in a world where religions of many are being persecuted, the growth of ecumenism and of the inter-faith movement are trends of recent times showing that religious people recognize that they have much in common, is the belief of Miss Winnifred Wygal, well known religious leader in the YWCA, who will visit this association soon.

Religions, as spoken of by Miss Wygal, is world-wide in its scope. She has had a splendid opportunity to get a practical view of religion and what it means to people of all nations, for she has traveled extensively and has also done considerable study in this country and abroad. She has been a student at a Union Theological Seminary, at Columbia University and has studied at Oxford, England. She

is a native of Missouri and at present is serving as a trustee for Drury College, Springfield, Mo., where she did her undergraduate work. She has been with the National YWCA since 1922. Most of that time she was with the student council of the YWCA and had ample opportunity to observe the trends that took place from year to year. She has found that along with the desire for social security, for recreation and cultural features is the desire for a greater knowledge and deeper understanding of religion and stability for soul.

During her years with the YWCA she has been the recipient of numerous requests from all departments of the association, each asking for program materials to be used in the study of religion. Back of each of these is an earnest desire on the part of groups to find something that provides assistance in finding a religion that will fit into one's social and personal life.

The heterogeneity of population of the United States is one of our valuable assets, Miss Wygal believes. Since the first World War, she says, we have become conscious of a sense of destiny and responsibility. We have a fighting chance to make a significant contribution to the world and to ourselves if we will preserve an attitude of humility and take the time for moments of reflection.

Miss Wygal points to the opinion of some leaders as particularly significant. These leaders say that the source of a solution for contemporary confusion may be in small groups held together by deep convictions, creeds and values. Such

NORTH CAROLINA MUTUAL MOVES FORWARD

Continued from page four

We do not have the facts in hand, but it appears to us that other Negro insurance companies are failing to live up to the gospel they preach and thrive by, if they are putting the most of the money they collect from Negroes in securities that will not benefit the race.

The North Carolina Mutual, by encouraging home ownership among Negroes, is doing much to raise the economic status of the race, thereby creating for itself more and better prospective policyholders, and it would be a fine thing if other Negro companies not doing so would fall in line.

1940. The decree was presented by Thurgood Marshall, special counsel for the National Association for the Advancement of Colored People, who has been handling the case.

Signing of the decree by Judge Chestnut, removed the last barrier to payment of equal salaries to Negro teachers in Anne Arundel County, short of carrying the case to the Supreme Court. The white school board had sought to get Negro teachers to agree to make the equalization become operative in September, 1941, but the teachers refused.
