

Legume Seed Supply Requires Plenty of Stretching

Because weather conditions have barred a plentiful supply of winter legume seed this year, it is necessary to make available supplies go as far as possible, says E. C. Blair, extension agronomist of N. C. State College.

This may be accomplished by reducing the rate of seeding per acre, but to do this the best possible methods of seed bed

preparation and planting must be followed.

Seeding legumes in September has two advantages. First, they do a better job of covering the land during the winter; and second, they are ready to turn under at least 30 days earlier next spring than if planted later.

Blair pointed out that a good seed bed should be prepared by shallow plowing or adequate disking, followed by harrowing and disking until soil is thoroughly pulverized. Soils that have not been limed in the past four or five years should receive an application of 1,200 to 2,000 pounds of ground limestone per acre before the last harrowing.

Then the crop should be fertilized with 200 pounds of 16 or 20 percent superphosphate and 50 pounds of muriate of potash per acre. This will cause the winter legume to make a much better growth and will, in turn, bring about a better yield of the following crop.

One of the best ways of conserving seed, the State College specialist explained, is through the use of a grain drill. Fifteen pounds of hairy vetch and 20 pounds of Austrian winter peas per acre will suffice where the seed are planted with drills. Crimson clover will give excellent results at 15 pounds per acre if the drill is equipped with a special attachment.

New York. — Ray Robinson, up and coming lightweight, won an easy technical knockout over Carl Guggino of Hartford, in 2:47 of round three in a scheduled eight round bout at the Queensboro Arena.

SEABOARD EXHIBITS FIRST ALL-FORESTRY TRAIN

The first all-forestry train in the South is being operated by the Seaboard Railway on an exhibition tour along its entire 4,500 miles of rail in the States of Virginia, North and South Carolina, Georgia, Alabama and Florida. Over fifty stops are scheduled on the 60-day tour. The exhibits show the benefits that accrue from the forests, and the damage caused by fires. The U. S. Forest Service, State and Extension Forestry Departments and Associations are cooperating in the operation.

Coal Shortage Is Feared; Says Expert Authority

Durham — The United States Government and the nation's coal dealers have been urging citizens to buy their winter supply of coal now. They have made this recommendation in an attempt to avoid further railroad car shortages and increases in coal prices.

Many Durham citizens up to now, however, have not been able to follow this recommendation because they didn't have the cash to pay for their winter coal supply in advance.

A new plan has just been announced by one of Durham's leading coal dealers which will help these citizens buy their coal now at Summer prices and have it delivered when they need it. The company is the Scott Coal Company, of which E. E. Council is president.

Mr. Council explained today that the new plan offered by the Scott Company will operate as follows:

BEAUTY AND ROMANCE

SPONSORED BY
L'ARIEUSE BEAUTY BUREAU

The L'arieuse Beauty Bureau was established by the Godefrey Manufacturing Company to study methods of preserving women's natural beauty, and to make the results of this research available to the public.

The real secret of beauty is making the best of every one of your good points and drawing attention away from your bad points. You have both, you know. Every woman has. But the girl who is considered beautiful is the one who lets you see her always looking her best.

Make-up is one of the most important aids to beauty that we have, but even make-up has its limitations. It should be used to enhance beauty, but it can't be expected to paint a whole new face on top of your own.

Here's a good rule to remember. Be lavish with your soap and water and with your cleansing creams; be sparing with your make-up. And speaking of cleansing, never, never go to bed without thoroughly cleansing your face! Many women prefer a thorough soap and water cleansing at night, followed by the application of a smooth night cream to help soften your skin while you sleep.

When it comes to make-up, be sure to do it in a good light, and take time enough to do it carefully. More and more, women are finding that they like a good foundation cream or make-up base, and there are many fine ones on the market. If you use a cream foundation, a cream rouge blends best. Use very little of it, just a touch on a finger tip, and smooth it carefully into your cheeks, following the cheekbone line, and blending the coloring so that it fades out at the edges.

The choice of a tone of powder is very important. Look for one which blends with and enhances your own skin coloring. Some girls like two shades—a darker one for the first coat, and a final brushing of a lighter tone for the second application.

In powdering, and in applying your powder base too, be sure to cover the neck and under the chin as well as your face.

Next comes your eye make-up. First, brush the powder from eyebrows and eyelashes. Then, with a sharp eyebrow pencil, accent the natural curve of the eyebrow line with short strokes. Never run a hard line through the eyebrows, for this gives an unpleasantly harsh and artificial effect. Eyelashes can be made to appear longer and thicker by a little mascara to darken the tips. Use a clean brush for this, and apply it very, very sparingly.

A really careful make-up takes a few minutes longer than a hasty slap-dash one, but those few minutes could not be better spent. You'll go out knowing that you look your prettiest, and that means so much to your poise and charm!

What are your beauty problems? Write: Marie Downing, L'arieuse Beauty Bureau, 3309 Lindell Blvd., St. Louis, Mo., and she will be glad to answer them. Be sure to enclose a self-addressed, stamped envelope.

"Visit the Scott Coal Company's office on East Pettigrew street. Place your order and make a deposit of \$1.00 per ton. Each following week or payday, make a payment of \$1.00 per ton until your coal is paid for in full."

"Thus you will have purchased your coal at Summer prices and you can be sure of getting it delivered when you need it."

"You will have avoided an almost certain rise in coal prices, and you will be enjoying the advantages of 'coal from silos.'"

The Scott Coal Company is the only place in Durham which stores its coal in concrete silos. This protects the coal from the rain, dusty winds, and snow. As an extra service, the coal is loaded directly from the silos through mechanical screens which vibrate 500 times a minute and remove dirt and foreign matter.

The State AAA committee chairman explained that this means farmers must estimate now their absolute minimum needs for machinery and repair parts for 1942.

MARRIED MEN DRINK MORE THAN SINGLE MEN

Greensboro, N. C., September 3. — (Special) "Married men drink more than single", stated C. D. Cunningham, Director of the Alcoholic Research Department, The Keeley Institute, Greensboro, North Carolina here today. A study of the history of over 400,000 patients taking the Keeley Treatment reveals that the relationship of the drinking habits of married and unmarried men have changed sharply during the past forty years.

"Back in 1899, two married men came to us for treatment for every unmarried patient. Today, the proportion is six to one", Mr. Cunningham continued. The same study revealed that the proportion did not change during the years of prohibition which were ended in most of the country in 1934.

"While these facts are surprising, they hold no special significance beyond the further recognition that greater education of our youth is needed to offset the natural tendency to yield more readily to temptation when a

man sets up a home for himself. This is verified by the additional fact that the heaviest drinking is done in the early thirties," Mr. Cunningham concluded.
