N. C. Farmers May Use Same Land, and Equipment In Drive

North Carolina farmers are being advised by state agricultural leaders to use their present farm equipment and cropland in the united effort to raise more food in 1942, says G. Tom

Scott, Johnston County farmer and chairman of the state USDA Defense Board.

The Tar Heel delegation of agricultural leaders which attended a 13-state food-for-freedom conference at Memphis, Tenn., last week agreed that North Carolina farmers could make their share of the nation's food increase goals with "just a few new investments in land and farm equipment."

Continuing, he said: "Secretary of Agriculture Wickard and the other Government leaders have outlined the needs very clearly. The farmers will be paid 85 percent of parity for the food they produce.

This has nothing to do with allotments, but is a new feature of the war effort. State goals will be broken down into county goals, and these into the individual farm goals. Every N. C. farmer must do his part," Dean Schaub declared, "and I am sure he will, just as he has done in past emergencies."

Give two workmen the same kind of stones and one will build a beautiful temple while the other will rear an unsightly structure. So is life.
